## **Interface Between Chemistry And Biochemistry:**

*Interface between Chemistry and Biochemistry* P. Jolles, H. Jörnvall, 2011-09-20 The developing importance of the interface between chemistry and biology is probably the largest change to have occurred in chemistry in the past 15 years. Increasingly more chemists work on problems dealing with biology and interfacial research is poised to move into the main stream of both disciplines. This merging of two types of approach has resulted in a vigorous research discipline with unprecedented potential to address important biological and chemical problems. A series of examples is developed in this book. Analytical aspects are discussed in several chapters. Fundamental concepts do not only derive from chemistry but chemistry has provided biochemistry with powerful tools of analysis. Equally important physicochemical methods allow studies of nucleic acids and lipids, lipases, receptors and other membrane proteins. Several chapters deal with enzymes in different contexts. The part devoted to metalloproteins is directed toward zinc metallochemistry and NMR structural work on zinc proteins. Chemists have been able to bring to biology their characteristic approach of synthesizing new molecules. These aspects are treated in chapters devoted to glycopeptides and uses of peptides as probes. Further fields of interest in combining different disciplines concern novel active compounds such as surfactant peptides and catalytic antibodies in studies resulting from close collaboration between chemists and biochemists.

Tibor Braun, Ernő Bujdosó, András Schubert, 2019-06-04 First Published in 1987 this book offers a full comprehensive guide into the Literature on Analytical Chemistry. Carefully compiled and filled with a vast repertoire of journals, Papers and References this book serves as a useful reference for Students of Chemistry and other practitioners in their respective fields.

*Interfaces Between Nanomaterials and Microbes* Munishwar Nath Gupta, Sunil Kumar Khare, Rajeshwari

Sinha, 2021-06-23 Nanomaterials are becoming ubiquitous microbes similarly are everywhere. This book focuses on various ways the diverse nanomaterials interact with microbial communities and implications of such interactions. Both toxicity and beneficial effects of nanomaterial-microbe interactions have been covered. This includes areas such as fate and bioavailability of nanomaterials in environments, microbial synthesis of nanomaterials and antimicrobial action of nanomaterials. Fairly comprehensive but with narrow focus the book provides useful insights into these interactions which need to be factored in while designing nanoscience based new technologies.

## **The Interaction of Sciences in the Study of the Earth**

D. I. Sheherbakov, V. V. Belousov, 2002 This book is a collection of articles on a variety of logically interlinked problems relating to the study of the earth and the evolution of the different sciences that engage in this study the geosciences as they are sometimes called the nature and place of modern geology among other sciences the tendencies in its development the specific features of the so-called geological form of motion of matter and its connection with other forms of motion the place of geophysics and geochemistry in the study of the planet and in the system of sciences investigating the earth some philosophical aspects of

the transformation of nature On a number of questions the authors express different points of view and the reader is able to judge for himself of the merits and demerits of their theories The volume will no doubt be of interest to geologists geophysicists geochemists geographers and philosophers to say nothing of the ever growing circle of inquisitive readers who take an interest in the exploration of our native planet and the philosophical and methodological questions deriving therefrom The papers were originally presented at joint the teorical conferences of philosophical methodological seminars scientific establishments of the U S S R Academy of Sciences The papers prepared for this collection were revised and supplemented by their authors *A Commemorative Issue in Honor of Professor Nick Hadjiliadis Metal Complex Interactions with Nucleic Acids and/or DNA* Sotiris K Hadjikakou,Christina N.
