Blood Work Shawn Salvant, 2015-01-12 The invocation of blood as both an image and a concept has long been critical in the formation of American racism In Blood Work Shawn Salvant mines works from the American literary canon to explore the multitude of associations that race and blood held in the consciousness of late nineteenth and early twentieth century Americans Drawing upon race and metaphor theory Salvant provides readings of four classic novels featuring themes of racial identity Mark Twain's Pudd'nhead Wilson 1894 Pauline Hopkins's Of One Blood 1902 Frances Harper's Iola Leroy 1892 and William Faulkner's Light in August 1932 His expansive analysis of blood imagery uncovers far more than the merely biological connotations that dominate many studies of blood rhetoric the racial discourses

of blood in these novels encompass the anthropological and the legal the violent and the religious Penetrating and insightful Blood Work illuminates the broad ranging power of the blood metaphor to script distinctly American plots real and literary of racial identity

Areford, 2017-07-05 Structured around in depth and interconnected case studies and driven by a methodology of material contextual and iconographic analysis this book argues that early European single sheet prints in both the north and south are best understood as highly accessible objects shaped and framed by individual viewers Author David Areford offers a synthetic historical narrative of early prints that stresses their unusual material nature as well as their accessibility to a variety of viewers both lay and monastic This volume represents a shift in the study of the early printed image one that mirrors the widespread movement in art history away from issues of production style and the artist toward issues of reception function and the viewer Areford's approach is intensely grounded in the object especially the unacknowledged material complexity of the print as a portable malleable and accessible image that depended on a response that was not only visual but often physical emotional and psychological Recognizing that early prints were not primarily designed for aesthetic appreciation the author analyzes how their meanings stemmed from specific functions involving private devotion protection indulgences the cult of saints pilgrimage exorcism the art of memory and anti Semitic propaganda Although the medium's first century was clearly transitional and experimental Areford explores how its potential to impact viewers in new ways both positive and negative was quickly realized **Churchill Madikida** Churchill Madikida, 2006 Blood James M.
