Bloodlines The Imperial Roots Of Terrorism In South Asia:

Bloodlines Sunil Dutta, 2015-06-22 Terrorism emerging in South Asia specifically in the Afghanistan Pakistan region has had a profound impact around the world. The region remains one of the world's poorest, most unstable and most terrorism-stricken areas. Al Qaeda, the Taliban and numerous other militant Islamist groups continue to thrive in this milieu. A succession of misguided Western and local counterterrorism policies has failed to address the dynamics that underlie these conflicts and so the recruitment, training and violence continue. Conventional analyses trace the origin of the region's terrorism to the Soviet invasion of Afghanistan and American support for the mujahideen in the 1980s. This merely scratches the surface and fails to grasp the depth and strength of terrorism's root causes. This book provides much needed depth to our understanding of the original causes and ongoing dynamics of terrorism in South Asia. Tracing today's challenges and threats to decisions made by the British colonial government, it provides a critical historical analysis of the emergence of terrorism in the region, the nexus between the Taliban and al Qaeda and the reasons for Pakistan's instrumental support of terrorism as a matter of state policy. By taking this deep view, the book not only shines a light on the ongoing threat dynamics but also lays the groundwork for understanding realistic U.S. policy options. *The Oxford Handbook of Terrorism* Erica Chenoweth, Richard English, Andreas Gofas, Stathis N. Kalyvas, 2019-03-14 The Oxford Handbook of Terrorism systematically integrates the substantial body of scholarship on terrorism and counterterrorism before and after 9/11. In doing so, it introduces scholars and practitioners to state-of-the-art approaches, methods and issues in studying and teaching these vital phenomena. This Handbook goes further than most existing collections by giving structure and direction to the fast-growing but somewhat disjointed field of terrorism studies. The volume locates terrorism within the wider spectrum of political violence instead of engaging in the widespread tendency towards treating terrorism as an exceptional act. Moreover, the volume makes a case for studying terrorism within its socio-historical context. Finally, the volume addresses the critique that the study of terrorism suffers from lack of theory by reviewing and extending the theoretical insights contributed by several fields including political science, political economy, history, sociology, anthropology, criminology, law, geography and psychology. In doing so, the volume showcases the analytical advancements and reflects on the challenges that remain since the emergence of the field in the early 1970s. *Homeland Security Cultures* Alexander Siedschlag, Andrea Jerkovic, 2018-07-12 *Homeland Security Cultures: Enhancing Values While Fostering Resilience* explores the role that culture plays in the study and practice of homeland security in an all-hazards, whole community and all-of-government scope. It does so by analyzing and discussing strategic, organizational, operational and social cultures in the U.S. Homeland Security Enterprise as well as from an international perspective. The focus is on how knowledge and interpretation, normative values, common symbols and/or action repertoires inform the evolution of the homeland security mission space and the accomplishment of homeland security functions. Contributions also address institutional changes designed to foster a more coherent common homeland security

culture This textbook will make a contribution to the evolution of homeland security as a policy area and a field of study by offering actionable insight as well as critical thinking from scholars and practitioners on how cultural aspects matter in balancing security against liberty in managing complex risks in enhancing collaboration across sectors and in explaining how a resilient nation can be fostered while enhancing liberal and democratic values *India in Britain* Susheila Nasta, 2012-11-16 Moving away from orthodox narratives of the Raj and British presence in India this book examines the significance of the networks and connections that South Asians established on British soil Looking at the period 1858-1950 it presents readings of cultural history and points to the urgent need to open up the parameters of this field of study

Chicago Marching: A History of Protest, Authority & Violence Joseph Anthony Rulli, 2023 Examine the inflection points in Chicago's history of protest A word packed with meaning and emotion protest can be synonymous with both free speech and rioting Chicago's citizens and city officials have a long and reactive relationship based on the tension between those differences of perspective from the 1855 Lager Beer Riot to the conversation surrounding Black Lives Matter and the flashpoints of extreme political polarization But what led to pivotal events like 1886's Haymarket Affair or 1963's massive school boycotts Joseph Rulli seeks to understand what provoked an explosion into violence or elicited a heavy handed response **Translating Nations** Ye Tian, 2024-12-30 This book critically examines the ways in which translation studies can offer a conceptual framework for understanding and researching international affairs drawing on examples from China's Belt and Road Initiative The volume encourages new conceptualisations of our understanding of culture and communication through the lens of translation re-envisioning translation beyond the scope of the global circulation of cultural products Tian explores the case study of the Belt and Road Initiative to show how nation branding and soft power can be understood through a translational lens if we rethink of translation as the means by which cultures communicate and build relationships with each other while retaining their distinct dimensions In focusing on intertwining concepts across translation studies cultural studies and international relations universalism power identity and development the book showcases how it is a useful framework for understanding how translation studies can serve as a platform for multidisciplinary dialogue on a global scale This book will be of interest to scholars in translation studies cultural studies international relations and Asian studies

Quill & Quire, 2002 Islamism and Intelligence in South Asia Prem Mahadevan, 2018 State sponsorship of terrorism is a complex and important topic in today's international affairs and especially pertinent in the regional politics of the Middle East and South Asia where Pakistan has long been a flashpoint of Islamist politics and terrorism In *Islamism and Intelligence in South Asia* Prem Mahadevan demonstrates how over several decades radical Islamists sometimes with the tacit support of parts of the military establishment have weakened democratic governance in Pakistan and acquired progressively larger influence over policy making Mahadevan traces this history back to the anti colonial Deobandi movement which was born out

of the post partition political atmosphere and a rediscovery of the thinking of Ibn Taymiyyah and partially ennobled the idea of jihad in South Asia as a righteous war against foreign oppression Using Pakistani media and academic sources for the bulk of its raw data and reinforcing this with scholarly analysis from Western commentators the book tracks Pakistan's trajectory towards a soft Islamic revolution Envisioned by the country's intelligence community as a solution to chronic governance failures these narratives called for a re-orientation away from South Asia and towards the Middle East In the process Pakistan has become a sanctuary for Arab jihadist groups such as Al Qaeda who had no previous ethnic or linguistic connection with South Asia Most alarmingly official discourse on terrorism has been partly silenced by the military intelligence complex The result is a slow drift towards extremism and possible legitimization of internationally proscribed terrorist organizations in Pakistan's electoral politics Bloomsbury Publishing

Radicalization in South Asia Mubashar Hasan, Kenji Isezaki, Sameer Yasir, 2019-09-25 Radicalization in South Asia Context Trajectories and Implications presents a critical overview of radicalism violence and terrorism in South Asia a region that is diverse in terms of demography religion culture and political ideologies While diversity could have worked as a push factor in strengthening democracies in the region historically fault lines in the South Asian faiths culture ethnicity nationalism and political ideologies have triggered radical movements and unleashed violence and terror attacks to destabilize democracies in the region Against the backdrop of the current wave of illiberalism and radicalism sweeping over the US Europe Middle East Australia and Latin America this book presents the most recent scenario of the context trajectories and policy implications for radicalism violence and terrorism in five South Asian countries including India Pakistan Bangladesh Sri Lanka and Maldives It emphasizes the comparative insights provided by the changing values of South Asian society to offer a comprehensive picture of radicalization in this region

The Politics of Extremism in South Asia Deepa M. Ollapally, 2008-08-21 South Asia is home to a range of extremist groups from the jihadists of Pakistan to the Tamil Tigers of Sri Lanka In the popular mind extremism and terrorism are invariably linked to ethnic and religious factors Yet the dominant history of South Asia is notable for tolerance and co-existence despite highly plural societies Deepa Ollapally examines extremist groups in Kashmir Afghanistan Northeast India Pakistan Bangladesh and Sri Lanka to offer a fresh perspective on the causes of extremism What accounts for its rise in societies not historically predisposed to extremism What determines the winners and losers in the identity struggles in South Asia What tips the balance between more moderate versus extremist outcomes The book argues that politics inter-state and international relations often play a more important role in the rise of extremism in South Asia than religious identity poverty and state repression

Terrorism, Security and Development in South Asia M. Raymond Izarali, Dalbir Ahlawat, 2021-04-29 This book provides a rich analysis of the actors and organizations to reflect on the antecedents and trajectories of terrorism and insurgency in South Asia and the different countermeasures adopted by the countries to deal with the security and developmental challenges South Asia is a complex geography that has been both a

victim and a playing field for indigenous insurgencies and domestic and transnational terrorist movements The contributors to this volume explore how this situation has posed serious challenges to the sovereignty of the states to national and human security and to the socioeconomic fabric of the communities and to the ethnic and religious cohesion The book provides detailed studies of country cases on terrorism security and insurgencies and it underlines the national regional and global implications of the threats that emanate from this region Presenting an opportunity to diversify away from a Western centric focus on terrorism and security this book will be valuable to researchers in political science criminology defense and security studies and to policy makers and think tanks
