

# THE ULTIMATE BLS FIELD GUIDE INFOGRAPHIC

Basic life support (BLS) skills can make the difference between life and death for a patient. A BLS field guide and summary sheet are essential for preparing responders for any resuscitation event.

SureFire CPR

911

## BLS Core Components

The two primary components of BLS are **cardiopulmonary resuscitation (CPR)** and automated external **defibrillator (AED)** use.

## 3 Steps of CPR

CPR involves a series of chest compressions and ventilation. To administer CPR, follow the **3 steps of CAB**:

1. Deliver **chest** compressions, using quick, firm motions
2. Open the **airway** by tilting the head and lifting the chin
3. Administer **breaths** (mouth-to-mouth breathing)

## Steps for AED Use

An AED is an effective and relatively simple device to use in the event of cardiac arrest. **To operate an AED, follow these steps:**

SureFire CPR

Activate the device immediately

Place pads on upper right and lower left sides of chest

Wait for the AED to analyze victim's heart rhythm

Follow prompts from device to shock or not to shock

Continue to monitor victim's heart rhythm

Follow additional prompts from the device

## What does Cardiac Arrest Look Like?

**Common signs of cardiac arrest include:**

Sudden loss of consciousness  
Gasping for air or not breathing at all  
No response to shaking or shouting  
No pulse detected within 10 seconds

## Assessing the Situation and the Patient

**When you encounter a person in need of assistance:**

Confirm the scene is safe before approaching the victim. If it is not, call 911 from a safe location

SureFire CPR

Activate the emergency response system and/or call 911 to get help on the scene.

If another responder is present, send them to retrieve an AED if one is available.

Check whether the patient is breathing by looking for a rise and fall on the chest.

Check for a pulse at the carotid artery on the neck (adults and children) or the brachial artery on the upper arm (infants).
