holders deserving of a meaningful role in decision making This book argues that a key albeit not the only means of ensuring appropriate participation in decision making about water management is for such participation to be legislatively mandated To this end the book draws on case studies in Australia and New Zealand in order to elaborate the legislative tools necessary to ensure Indigenous participation consultation and representation in the water management landscape

General Assembly,2016 Five Rising Democracies Ted Piccone,2016-02-23 Shifting power balances in the world are shaking the foundations of the liberal international order and revealing new fault lines at the intersection of human rights and international security Will these new global trends help or hinder the world s long struggle for human rights and democracy The answer depends on the role of five rising democracies India Brazil South Africa Turkey and Indonesia as both examples and supporters of liberal ideas and practices Ted Piccone analyzes the transitions of these five democracies as their stars rise on the international stage While they offer important and mainly positive examples of the compatibility of political liberties economic growth and human development their foreign policies swing between interest based strategic autonomy and a principled concern for democratic progress and human rights In a multipolar world the fate of the liberal international order depends on how they reconcile these tendencies *The Consequences of Chaos* Elizabeth G. Ferris,Kemal Kirisci,2016-04-05 The massive dimensions of Syria s refugee crisis and the search for solutions The civil war in Syria has forced some 10 million people more than half the country s population from their homes and communities creating one of the largest human displacements since the end of World War II Daily headlines testify to their plight both within Syria and in the countries to which they have fled The Consequences of Chaos looks beyond the ever increasing numbers of Syria s uprooted to consider the long term economic political and social implications of this massive movement of people Neighboring countries hosting thousands or even millions of refugees Western governments called upon to provide financial assistance and even new homes for the refugees regional and international organizations struggling to cope with the demands for food and shelter all have found the Syria crisis to be overwhelming in its challenges And the challenges of finding solutions for those displaced by the conflict are likely to continue for years perhaps even for decades The Syrian displacement crisis raises fundamental questions about the relationship between action to resolve conflicts and humanitarian aid to assist the victims and demonstrates the limits of humanitarian response even on a massive scale to resolve political crises The increasingly protracted nature of the crisis also raises the need for the international community to think beyond just relief assistance and adopt developmental policies to help refugees become productive members of their host communities *Initial Report Submitted by India Under Article 35 of the Convention* United Nations. Committee on the Rights of Persons with Disabilities,2017 **Arctic Potential** Rex W. Tillerson,2015 This report was prepared in response to Secretary of Energy Ernest J Moniz s request and provides a comprehensive study that considers research and technology opportunities to enable prudent development of U S Arctic offshore oil and natural gas resources Today there is both increasing interest in the Arctic for economic opportunity and concern about the future of the culture of the Arctic peoples and the environment in the face of changing climate and increased human activity Other nations such as Russia and China
