Method, Methodology and Research Design in Artistic Research Falk Hübner, 2024-03-28 *Method Methodology and Research Design in Artistic Research Between Solid Routes and Emergent Pathways* offers a rich and innovative approach to method research design and methodology of research in and through the arts. It spans the process from initial research design ongoing and continuous decisions that need to be made while designing and carrying out research up to the analysis and reflection on this process when finished. Drawing on a huge body of experience, examples of renowned artist researchers in the international field as well as on contemporary posthumanist philosophy and methodological literature in the humanities and social sciences, in particular the conceptual core of the book is the author's Common Ground model for research design. Hübner suggests a flexible approach both for the overall research design as well as for the from scratch design of distinct methods. This means in particular to provide space for the unknown and for the occasional messiness of research in and through the arts. The book provides a thorough exploration of the emergent aspects and unforeseen paths that come up during a research trajectory. Transdisciplinary in scope, this is not just a book about but to work with methodology supporting both seasoned and early career researchers as well as supervisors in graduate post graduate and doctoral education contexts.

Handbook Of Pattern Recognition And Computer Vision (3rd Edition) Chi Hau Chen, Patrick S P Wang, 2005-01-14 The book provides an up to date and authoritative treatment of pattern recognition and computer vision with chapters written by leaders in the field. On the basic methods in pattern recognition and computer vision, topics range from statistical pattern recognition to array grammars to projective geometry to skeletonization and shape and texture measures. Recognition applications include character recognition and document analysis, detection of digital mammograms, remote sensing, image fusion and analysis of functional magnetic resonance imaging data etc. There are six chapters on current activities in human identification. Other topics include moving object tracking, performance evaluation, content based video analysis, musical style recognition, number plate recognition etc.

Doing Document Analysis Kristin Asdal, Hilde Reinertsen, 2021-12-08 Uniting methods from disciplines across the social sciences and humanities, this hands-on guide develops a novel approach to doing document analysis. The authors present a framework for studying documents that enables you to conduct a rich and systematic analysis of documents in all their diversity. Focussing on document analysis both in practice and as practice, the book provides you with an innovative and versatile toolkit for analysing print and digital documents. It also highlights the impacts of digitalisation on documents themselves and the methods used to study them. Has a strong focus on research ethics and critical engagement with digital sources. Offers practical guidance on preparing and doing a document analysis research project. The book offers insightful perspectives both on the indispensable role of documents in our society and practical advice on how you can best analyse documents and their significance.
