frustrating reality she faced was that subject matter experts in various departments held the critical information she needed but few were willing to write their parts of the plan She tried and failed using all the usual methods to educate and motivate and even threaten departments to meet her deadlines Finally she decided there had to be a better way The result was an incredibly successful BCM program that was adopted by BCM managers in other companies She calls it The Three S s of BCM Success which can be summarized as Simple Strategic Service Oriented Loyear s approach is easy and intuitive considering the BCM discipline from the point of view of the people in your organization who are tasked to work with you on building the plans and program She found that most people prefer Simple solutions when they are faced with something new and different Strategic use of their time making their efforts pay off Service to be provided lightening their part of the load while still meeting all the basic requirements These tactics explain why the 3S program works It helps you it helps your program and it helps your program partners Loyear says If you follow the Three S philosophy the number of plans you need to document will be fewer and the plans will be simpler and easier to produce I ve seen this method succeed repeatedly when the traditional method of handing a business leader a form to fill out or a piece of software to use has failed to produce quality plans in a timely manner In The Manager s Guide to Simple Strategic Sevice Oriented Business Continuity Loyear shows you how to Completely change your approach to the problems of BCM buy in Find new ways to engage and support your BCM program partners and subject matter experts Develop easier to use policies procedures and plans Improve your overall relationships with everyone involved in your BCM program Craft a program that works around the roadblocks rather than running headlong into them Business Continuity Manager (Bcm) Complete Self-Assessment Guide Gerardus Blokdyk,2018-08-20 Are assumptions made in Business Continuity Manager BCM stated explicitly What management system can we use to leverage the Business Continuity Manager BCM experience ideas and concerns of the people closest to the work to be done Who is responsible for ensuring appropriate resources time people and money are allocated to Business Continuity Manager BCM What are the basics of Business Continuity Manager BCM fraud What other jobs or tasks affect the performance of the steps in the Business Continuity Manager BCM process Defining designing creating and implementing a process to solve a challenge or meet an objective is the most valuable role In EVERY group company organization and department Unless you are talking a one time single use project there should be a process Whether that process is managed and implemented by humans AI or a combination of the two it needs to be designed by someone with a complex enough perspective to ask the right questions Someone capable of asking the right questions and step back and say What are we really trying to accomplish here And is there a different way to look at it This Self Assessment empowers people to do just that whether their title is entrepreneur manager consultant Vice President CxO etc they are the people who rule the future They are the person who asks the right questions to make Business Continuity Manager BCM investments work better This Business Continuity Manager BCM All Inclusive Self Assessment enables You to be that person All the tools you need to an in
