Huang,Jason Snipes,Neal Finkelstein,2016 Middle school math placement and progression are topics that are part of an active policy and practice discussion in California and elsewhere Beginning in the 2008 09 school year California s State Board of Education recommended that students complete algebra I by the end of grade 8 Between 2003 and 2009 the proportion of grade 8 students taking algebra I rose from 32 percent to 54 percent Williams et al 2011 This increase resulted in a larger percentage of grade 8 students scoring proficient or advanced achieving proficiency on the algebra I California Standards Test CST see box 1 for definitions of key terms used in this report and in a larger number of grade 8 students scoring far below basic or below basic on the test Williams et al 2011 Recent studies show that enrolling in algebra I in grade 8 works well for some students but backfires for others The consequences of misplacement are most pronounced for students with weaknesses in key foundational areas that support algebra readiness which frequently translates into difficulty reaching proficiency in higher level math in high school Finkelstein et al 2012 One study of California students concludes that placing all grade 8 students in algebra I regardless of their preparation sets up many students to fail Williams et al 2011 Recent longitudinal analysis of California statewide assessment data suggests that students who do not take algebra I in grade 8 but are successful in general math have a better chance of succeeding in algebra I when they wait until grade 9 Liang Heckman Abedi 2012 Tables and figures are appended      Bulletin University of Minnesota,1928      *The ETS Test Collection Catalog*
