Global Intellectual Property Protection and New Constitutionalism Jonathan Griffiths, Tuomas Mylly, 2021-11-22 The constitutionalization of intellectual property law is often framed as a benign and progressive integration of intellectual property with fundamental rights Yet this is not a full or even an adequate picture of the ongoing constitutionalization processes affecting IP This collection of essays written by international experts and covering a range of different areas of intellectual property law takes a broader approach to the process Drawing on constitutional theory and particularly on ideas of new constitutionalism the chapters engage with the complex array of contemporary legal constraints on intellectual property law making Such constraints arising in international intellectual property law human rights law including human rights protection for right holders investment treaties and forms of private ordering This collection aims to illuminate the complex role of this constitutional framework by analysing the overlaps complementarities and conflicts between such forms of protection and seeking to establish the effects that this assemblage of global and regional norms has on legal reform projects and interpretations of IP law Some chapters take a broad theoretical perspective on these processes Others focus on specific situations in which the relationship between intellectual property law and broader constitutional norms is significant These contexts range from Art 17 of the EU s Digital Single Market Directive to the implementation of harmonized trade secrets protection from the role of Canada s Charter of Rights to the impact of the social model of property in Brazil

Package & Unified Patent Court Luc Desautnettes-Barbero,Fernand de Visscher,Alain Strowel,Vincent Cassiers,2023-06-09

As of 1st of June 2023 after years of negotiations setbacks and postponements the Unitary Patent Package UPP enters into force the European patent with unitary effect EPUE becomes a reality and the Unified Patent Court UPC starts its activities Regrettably the patent regime put in place is not a genuine EU system Adopted through an enhanced cooperation procedure it firstly does not include all EU Member States Secondly the conditions and the procedure for granting EPUE is in the hands of the European Patent Office an international organization to which EU is not a party Lastly the substantive provisions and the litigation proceedings are defined by an international treaty the UPC Agreement to which EU is not a member and by national laws for the remaining aspects Such system carves patent law out of the EU legal and judicial orders and reduces the roles of the EU Parliament and Court of Justice Challenges are numerous in terms of complexity harmonization objectives legality business advantages and wider societal economic and legal concerns to name a few With twenty eight contributions from academics and practitioners this book starts with putting the new system into historical comparative and institutional contexts Part I before highlighting some issues under EU law and the perspective of EU integration Part II The institutional jurisdictional and procedural questions raised by the UPC are then addressed Part III as well as the innovation and markets issues Part IV The last contributions discuss possible improvements and alternatives to the Unitary Patent Package Part V

principle the book deconstructs the shifting foundations of authorship in Western legal thought It examines the persona as a cultural text unrecognized by copyright law the hybrid nature of publicity rights authorship and the influence of postmodern vocabulary on legal adjudication Crucially it critically engages with the exclusion of Gen AI from authorship highlighting how legal doctrine rather than objective artistic neutrality determines creative legitimacy Bridging copyright and trademark law this book argues for a re evaluation of the balance between persona authorship and cultural control offering a compelling framework for understanding the future of intellectual property in the digital age It challenges conventional narratives and proposes new pathways for navigating authorship in a technologically mediated world The book will be of interest to anyone interested in the evolution of intellectual property law the intersection between law and culture and the impact of law and culture on the unique dilemmas posed by artificial intelligence
