Seminar language English abstract A discussion of children s literature as a topic of a research paper suggests the treatment
of something new a matter rather unexplored or at least not as exhausted as most aspects of the quite popular area of
children s literature tend to be with respect to student s papers in English literature Something new would imply a book
recently published considering that a new publication is not likely to be exhausted by studies This would also call for a
discussion of the readership as time changes very fast today and people change with time so that children living around the
turn of the millennium may need and expect different things than children of the past In fact the present situation for
children s literature is a subject of particular concern for technological development has influenced the matter of reading to a
large extent and voices become audible that fear a decline of reading culture especially with reference to children and youths
This changed reading situation will be the starting point of my paper Research in Education ,1974 **Book Analysis:**
