Tourism and Sustainability Martin Mowforth, Ian Munt, 2003-12-08 Tourism and Sustainability explores and challenges the notions of development sustainability globalisation and power and their relationship to contemporary tourism in the third world

Tourism and Sustainability Martin Mowforth, Ian Munt, 2015-12-22 By January 2015 the world's richest 80 people had as much wealth as the poorest 50 per cent of the world's population. It is a global unevenness through which the barriers to migration of Third World migrants to wealthy First World nations go ever higher while the barriers to travel in the reverse direction are all but extinct. So how exactly does tourism contribute to narrowing this glaring inequality between the rich and poor? Are ever expanding tourism markets a smoke-free socioculturally sensitive form of human industrialisation? Is alternative tourism really a credible lever for reducing global inequality and eliminating poverty? Tourism and Sustainability critically explores the most significant universal geopolitical norms of the last half century: development, globalisation and sustainability, and through the lens of new forms of tourism demonstrates how we can better get to grips with the rapidly changing new global order. The fourth edition has been extensively revised and updated and benefits from the addition of new material on climate change and tourism. Drawing on a range of examples from across the Third World, Mowforth and Munt expertly illustrate the social, economic and environmental conditions that continue to affect the tourism industry. With the first edition hailed by Geoffrey Wall as one of the most significant books produced on tourism since the turn of the millennium, Tourism and Sustainability remains the essential resource for students of human geography, environmental sciences and studies, politics, development studies, anthropology and business studies, as well as tourism itself.

Tourism, Globalization and Development Donald G. Reid, 2003-07-20 Tourism is booming world wide it makes up a massive part of the global economy

Donald G Reid's book focuses on tourism in developing and less developed countries. He examines its social and environmental impact and offers a timely critical analysis of the part it plays in globalisation. Many of the world's poorest countries rely on the tourist trade for the major part of their income. However, all too often the local communities involved do not reap the benefits of this trade. Developers often exclude local communities from the initial planning and decision-making process, viewing them either as a benign resource to be exploited or as an impediment. This is a rigorous critique of corporate-led tourism development which lays out alternatives for planning and control to the local communities. It argues that only in this way can the vastly differing requirements of each community be addressed and social and environmental issues can be dealt with properly. The book includes a discussion of macro planning theory and offers three case studies of locally controlled projects that show clearly how communities developing a tourist trade can benefit. Sport Tourism and Local Sustainable Development Claude Sobry, Sorina Cernaianu, 2022-02-08 Sport tourism is now widely regarded as a tool for sustainable local development. This book brings together 24 authors from a range of countries to address this topic with analyses ranging from particular types of events to more theoretical approaches concerning the role of sport tourism in the development of Spanish cities or the digital communication of sporting events in Italy as a means of promotion. The book is geared towards academic researchers and students interested in sport tourism, sport economics, management and sustainable development as well as policymakers and professionals tasked with dynamic tools to promote their territory. *Routledge International Handbook of Sustainable Development* Michael Redclift, Delyse Springett, 2015-03-02 This Handbook gives a comprehensive international and cutting-edge overview of Sustainable Development. It integrates the key imperatives of sustainable development: namely institutional, environmental, social and economic, and calls for greater participation, social cohesion, justice and democracy as well as limited throughput of materials and energy. The nature of sustainable development and the book's theorization of the concept underline the need for interdisciplinarity in the discourse as exemplified in each chapter of this volume. The Handbook employs a critical framework that problematises the concept of sustainable development and the struggle between discursivity and control that has characterised the debate. It provides original contributions from international experts coming from a variety of disciplines and regions including the Global South. Comprehensive in scope, it covers amongst other areas: Sustainable architecture and design, Biodiversity, Sustainable business, Climate change, Conservation, Sustainable consumption, De-growth, Disaster management, Eco-system services, Education, Environmental justice, Food and sustainable development, Governance, Gender, Health, Indicators for sustainable development, Indigenous perspectives, Urban transport. The Handbook offers researchers and students in the field of sustainable development invaluable insights into a contested concept and the alternative worldviews that it has fostered. **Sustainable Tourism Development** Lotte von Lignau, 2013-07-04 Seminar paper from the year 2013 in the subject Tourism. English abstract The world's resources are limited and will sooner or later come to an end. This is an undeniable fact as the consequences of decades of reckless exploitation are painfully being brought to our eyes by countless reports on continuing ozone depletion, growing desertification, fatal meltdown of the polar caps and inexorable global warming. Yet the plain realization does not always go hand in hand with immediate action. While there is a new global consciousness towards ecology and the preservation of nature, there is still a long way to go in order to avert the earth's destruction. The tourism sector, being described by the UNWTO 2012 p. 2 as one of the world's largest and fastest growing industries, plays a crucial role in this context. The enormous growth not only in the transportation sector holds a major responsibility for increasing CO₂ emissions worldwide. But it is not only the environmental destruction that the tourism industry needs to fear and assume responsibility for. Negative impacts of Globalization are being accelerated as the tourism sector continues to grow. The rich become richer on the expense of the poor; local communities are being exploited as tourist attractions and traditions and social structures get lost due to increasing intercultural contacts. If the tourism industry does not take immediate action, it will destroy its most important resources: beautiful nature, traditional culture and the hospitality of local people. But is it really this easy? Are all globalization effects negative? Do the poor always have to be the losers in this process? Is it exploitation when local communities show their traditions to foreigners? Or is it a welcome opportunity to generate new income and improve the well-being of the people? Who decides what is good for the world and on what basis? For many tourism businesses, the term sustainable development has become a keyword. Can this concept show a way out of the dilemma? Or is it just an empty shell used to improve one's reputation and boost sales? These are some of the questions that will be addressed in this paper in order to evaluate the future of the concept of sustainable development for the tourism industry.
