Gotz, 1999-10-30 Most contemporary analyses of sexism focus on economic social and political inequalities and suggest appropriate remedies In contrast G tz argues that sexism arises at least in part out of a subconscious male envy of women s capacity to receive He refers to this as womb envy The obvious ground of this envy is the realization by

the growing boy that women have something he lacks G tz documents this subconscious envy as reference to a variety of mythological motifs fairy tales and religious beliefs including theological constructs His study is cross cultural though special emphasis is placed on Western traditions The importance of mythology especially is the fact that it bears witness to people s real beliefs and that it does so for a considerably long period of time Thus myths become a good proof of the hypothesis of womb envy G tz also explores briefly some psychological mechanisms operative in the formation of womb envy and he examines schooling as one institution that has perpetuated the womb envy that is so much a part of sexism A provocative analysis this will be of interest to the general public as well as scholars and researchers involved with Women s and Religious Studies education psychology and philosophy
