Isbell, Christy Isbell, 2003 The Complete Learning Spaces Book for Infants and Toddlers is designed to help busy teachers meet the challenge of creating an effective learning environment for very young children. It includes ideas for planning, using and evaluating learning spaces that will captivate infants and toddlers and encourage the developmental process. The Late Paintings of Velázquez Giles Knox, 2017-07-05 The startling conclusion of The Late Paintings of Velázquez is that Diego Velázquez painted two of his most famous works, The Spinners and Las Meninas, as theoretically informed manifestos of painterly brushwork. As a pair, Giles Knox argues, the two paintings form a learned retort to the prevailing critical disdain for the painterly. Knox presents a Velázquez who was much more aware of the art theory of his era than previously acknowledged, leading him to reinterpret Las Meninas and The Spinners as representing together a polemically charged celebration of the handedness of painting. Knox removes Velázquez from his Iberian isolation and seeks to recover his highly self-conscious attempt to carve out a place for himself within the history of European painting as a whole. The Late Paintings of Velázquez presents an artist who, like Annibale Carracci, Poussin, Rembrandt and Vermeer, was not only aware of contemporary theoretical writings on art but also able to translate that knowledge and understanding into a distinctive and personal theory of painting. In Las Meninas and The Spinners, Velázquez propounded this theory with paint, not words. Knox's rethinking of the dynamic relationship between text and image presents a case not of writing influencing painting or vice versa but of the two realms being inextricably bound together. Painterly brushwork presented a challenge to writers on art not just because it was connected too intimately with the base actions of the hand, it was also devilishly hard to describe. By reading Velázquez's painterly performance as text, Knox deciphers how Velázquez was able to craft theoretical arguments more compelling and more vivid than any written counterparts.
