Fun Pirating + CD , Print & Digital Federal Publications Catalog ,2014 Digital Forensics and Cyber Crime Sanjay Goel,2010-01-13 The First International Conference on Digital Forensics and Cyber Crime ICDF2C was held in Albany from September 30 to October 2 2009 The field of digital forensics is growing rapidly with implications for several fields including law enforcement network security disaster recovery and accounting This is a multidisciplinary area that requires expertise in several areas including law computer science finance networking data mining and criminal justice This conference brought together practitioners and researchers from diverse fields providing opportunities for business and intellectual engagement among attendees All the conference sessions were very well attended with vigorous discussions and strong audience interest The conference featured an excellent program comprising high quality paper presentations and invited speakers from all around the world The first day featured a plenary session including George Philip President of University at Albany Harry Corbit Superintendent of New York State Police and William Pelgrin Director of New York State Office of Cyber Security and Critical Infrastructure Coordination An outstanding keynote was provided by Miklos Vasarhelyi on continuous auditing This was followed by two parallel sessions on accounting fraud financial crime and multimedia and handheld forensics The second day of the conference featured a mesmerizing keynote talk by Nitesh Dhanjani from Ernst and Young that focused on psychological profiling based on open source intelligence from social network analysis The third day of the conference featured both basic and advanced tutorials on open source forensics [Federal Register ,2002-05-03](#)

Thunderstorms, Tornadoes, Lightning, Nature's Most Violent Storms: a Preparedness Guide, Including Tornado Safety Information for Schools National Weather Service (U.S.),American Red Cross,American Red Cross Staff, Homeland Security Dept. (U.S.),2014-07-28 This illustrated guide showcases some facts about weather related events and suggests life saving actions you can take if you find yourself in an unexpected situation resulting from a weather related event The goal of this booklet is to present you with details on how to recognize severe weather be aware of your surroundings and to encourage you to develop a plan to be ready to act when threatening weather approaches Here is a bird's eye view of the weather related events that are covered in this guide with a few short facts about each that are also presented in the guide Lightning Causes an average of 55-60 fatalities and 400 injuries each year Occurs with all thunderstorms Costs more than 1 billion in insured losses each year Tornadoes Cause an average of 60-65 fatalities and 1,500 injuries each year Can produce wind speeds in excess of 200 mph Can be 1 mile wide and stay on the ground over 50 miles Straight line Winds Can exceed 125 mph Can cause destruction equal to a tornado Are extremely dangerous to aviation Flash Floods and Floods Are the 1 cause of deaths associated with thunderstorms more than 90 fatalities each year Hail Can be larger than a softball 5 inches in diameter Causes more than 1 billion in crop and property damage each year Some helpful tips included in this guide include how quickly these weather events can result to a devastating situation Therefore it

emphasizes that by having a plan in place prior to the event that is practiced from time to time will allow response actions to be positive rather than stressful This resource also provides guidance on the type of items that should be included in an Emergency Supply Kit for use at home office school or place of business There is also a special section dedicated to schools and working with children during an unexpected weather emergency This school section also includes proper inspections and maintenance of buildings and recommends emergency drills to practice the school safety plans with children including handling of disabled personnel and or children

Advances in Construction Materials 2007 Christian U. Grosse, 2007-08-14 This book addresses one of the most important material categories Materials used for construction A large percentage of the gross national product of most countries goes into infrastructure and buildings This statement is true not only for the present but for most other periods in history and for most cultures This explains why understanding the behavior of construction materials has always been the subject of intense investigations The construction industry consumes extreme volumes of material and the growing demand for quality and safety require continuous improvement of materials and material compositions A deep understanding of material behavior is essential to enable efficient construction light weight or heavily burdened structures ask for the development of innovative composites or new material compositions Rapid economic growth and a dense and growing population require sensitive and sustainable use of resources Finally efficient use of resources means extending the usage of existing structures so non destructive testing methods are needed to assess the safety and utility of these structures Civil Engineers and Material Scientists from all over the world are openly discussing ideas for new materials and for structural health monitoring Over the last decade many innovations have come to fruition primarily in the field of composites but also for improving the design of existing material This is especially true for concrete perhaps the most used material in the world broadening its range of applications and improving performance
