Bittinger, 2001-12 The BPB team has created a book where the use of the graphing calculator is optional but visualizing the mathematics is not. By creating algebraic visual side by sides the authors show students the relationship of the algebraic solution with the visual often graphical solution. In addition to helping students visualize the math with the side by sides the authors focus on helping students make the connection between x intercepts zeros and solutions both visually and algebraically.

Penna, 2012-01-23 The Graphs and Models series by Bittinger Beecher Ellenbogen and Penna is known for helping students see the math through its focus on visualization and technology. These texts continue to maintain the features that have helped students succeed for years: focus on functions, visual emphasis side by side algebraic and graphical solutions and real data applications. With the Fifth Edition, visualization is taken to a new level with technology. The authors also integrate smartphone apps encouraging readers to visualize the math. In addition, ongoing review has been added with new Mid Chapter Mixed Review exercise sets and new Study Guide summaries to help students prepare for tests.
