*Steven Ehrlich Architects* Steven Ehrlich, 1998 Steven Ehrlich Architects One of an emerging group of important young architects from Southern California Steven Ehrlich explores the vitality of serene yet kinetic forms and spaces the richness of texture and materials and the relationship of architecture to community The work of Steven Ehrlich Architects is distinctly modern yet informed by the simplicity and directness of vernacular forms and a vigorous sensitivity to the urban conditions of the Pacific Century Their designs represent the intersection of cultural influences as diverse as traditional African mud construction the ancient Chinese discipline of feng shui and California's Latino community    **Bits and Spaces** Maia Engeli, 2001 Edited by Professor Maia Engeli and with a contribution by Professor Gerhard Schmitt both of the Swiss Federal Institute of Technology ETH Zürich this book presents 33 exciting new projects which demonstrate the growing significance of CAAD for today's architects Divided into 5 main chapters Design in Space and Time Learning and Creative Collaboration Virtual Environments IT and Practice and Blurring Boundaries the projects illustrate how computers can be used innovatively and creatively in designing physical virtual and hybrid architecture Particular emphasis is placed on the interaction between man and computer and also on the aesthetic aspects The book is accompanied by a CD Rom which documents the design processes through animation sequences demonstrating the dynamic features of the projects Whilst these tools installations and multi media projects have arisen out of the field of architecture they exceed the narrow confines of this discipline to touch upon areas such as interior design graphic design and information technology The designs presented are colourful and complex seeking to fire the imagination in creating a fitting environment for today's society    [Palm Beach Life](#) , 2007-01

interaction in various types of YEs Two previous volumes in this CSCW book series 2 3 have examined related aspects of research on YEs social navigation and collaboration although they do not always deal with VRIVEs in the sense that it is used here see the definition in Chapter 1 The aim of this volume is to explore how people interact with each other in computer generated virtual worlds

**Walking the Möbius Strip** Johanna Heil,2016 Walking the Mobius Strip locates Richard Powers s fiction at the crossroads of postmodern and post postmodern aesthetics and argues that this paradigm shift shapes the models of knowledge and understanding that underwrite his work The readings of Plowing the Dark Galatea 2 2 and The Echo Maker are inspired by Jacques Lacan s image of cognition as a Mobius strip on which different forms of propositional and non propositional knowledge bleed into and depend upon one another Drawing on feminist epistemology and psychoanalysis this study highlights Powers s interest in the non propositional aspects of cognition that is in all that escapes the frameworks of scientific empiricism and can only be known through the mediation of fictional narrative It reveals a deep dissatisfaction in the novels with the suggestion that knowledge and understanding must be objective and rational and elucidates Powers s idea that fiction can be a powerful tool for integrating various kinds of knowledge
