Is Math Real? Eugenia Cheng, 2023-08-15 One of the world's most creative mathematicians offers a brilliant and mesmerizing Popular Science new way to look at math focusing on questions not answers Winner of the Los Angeles Times Book Prize and a New Scientist Best Book of the Year Where do we learn math From rules in a textbook From logic and deduction Not really according to mathematician Eugenia Cheng we learn it from human curiosity most importantly from asking questions This may come as a surprise to those who think that math is about finding the one right answer or those who were told that the dumb question they asked just proved they were bad at math But Cheng shows why people who ask questions like Why does $1 + 2 = 3$ are at the very heart of the search for mathematical truth **Is Math Real** is a much needed repudiation of the rigid ways we're taught to do math and a celebration of the true curious spirit of the discipline Written with intelligence and passion **Is Math Real** brings us math as we've never seen it before revealing how profound insights can emerge from seemingly unlikely sources *Buckle Down! on Ohio Reading*, 1995 *The Humongous Book of Trigonometry Problems* W. Figure It Out, Henri Weldon Tanita S. Davis, 2023-01-17 Tanita S. Davis, author of *Partly Cloudy* and *Serena Says*, has written another funny, warm story featuring middle school and family life. All about the complex calculations it takes for everyone to balance the equations of their lives and what it takes to be part of a team while handling a learning disability. This middle grade novel is perfect for fans of *From the Desk of Zoe Washington* and *A Good Kind of Trouble*.

Seventh grader Henrietta Weldon gets to switch schools finally. She'll be mainstreaming into public school, leaving her special education school behind. She can't wait for her new schedule, new friends, and new classes. Henri's dyscalculia, a learning disability that makes math challenging to process and understand, is what she expects to give her problems. What she doesn't expect is a family feud with her sister over her new friends joining the girls' soccer team and discovering poetry. Henri's tutor and new friend Vinnie reminds her to take it slow. One problem at a time. If Henri Weldon has twenty-four hours in a day and she has two siblings who dislike her, four new friends, two hours of soccer practice, seven hours of classes, and three hours of homework, she has:

A. No free time
B. No idea how to make everyone happy
C. No time to figure it out

Henri Weldon **Biting the Apple** Kevin Ryan, 1980 This book stresses the first year of teaching, the introduction to the profession, the positive and negative experiences, the results and effect on the novice teacher. Twelve teachers relate their first year experiences, giving the reader insight into what lies ahead.

Shut Up and Let the Lady Teach Emily Sachar, 1991 A journalist's year as an 8th grade teacher in a Brooklyn public school.
