**New Perspectives on the Divide Between National and International Law** Janne E. Nijman, André Nollkaemper, 2007-11-01 This book aims to contribute to our understanding of one of the most pressing issues of modern international law: the relationship between the international legal order on the one hand and the domestic legal orders of over 190 sovereign states on the other hand. The traditional and dominant understanding of this relationship is that there exists a strict separation between the international legal order and domestic legal orders. Processes of legal globalisation and internationalisation have made this relationship much more complex. Legal authority has shifted away from the state in both vertical and horizontal directions. Forced by the pressures of interdependence, states have allowed international bodies to oversee and sometimes even implement and enforce domestic legislation. At the same time, private persons are more and more drawn into an internationalized order. Increasing cross-border flows of services, goods, and capital mobility and communication have further undermined any stable notion of what is national and what is international. This book offers several partly complementary and partly competing perspectives that allow us to understand and make sense of the complex interaction between the international and domestic sphere.

**Making Fiscal Decentralization Work** Ms. Annalisa Fedelino, 2010-10-06 The question of what makes fiscal decentralization work is faced by many policymakers around the world. This book draws on both the relevant literature and policy and technical advice provided by the IMF to a wide range of member countries and discusses the key factors that help make decentralization sustainable, efficient, and equitable from a macroeconomic perspective. It focuses on institutional reforms in the revenue and expenditure assignments to different levels of government, the design of intergovernmental transfers, and public financial management systems that are suited to different countries, circumstances, and their appropriate sequencing.

Evaluation of UNDP Contribution to Strengthening National Capacities United Nations Development Programme. Evaluation Office, 2010 As countries take ownership of the development agenda, enhancing sustained abilities for countries to do things for themselves takes centre stage as a critical element of development effectiveness. UNDP's support to this nationally driven process plays a critical role in enhancing its leadership role in capacity development. For UNDP, capacity development is the how of what it does, and UNDP has put in extraordinary resources in its conceptualization and activities. UNDP has received international recognition for its lead role in the area. The model applied by UNDP is, however, largely a supply-driven model which is not bolstered by adequate organizational learning and incentive systems. The evaluation recommends that UNDP continue to enhance its lead role at the international level while developing and applying a model which is nationally driven and seek to develop increased conceptual and managerial integration within the organization consistent with the objectives of the strategic plan. Of particular importance is rigor in engaging governments in all contexts in addressing the longer-term requirements of capacity development. Publisher's website
