- Imaging For Photon Science Jiaguo Zhang,Iain Sedgwick,Cornelia B. Wunderer,2024-12-24 Developments of cutting edge X ray imaging detectors are largely driven by experiments at the large photon science facilities i e the synchrotron radiation sources and free electron lasers FELs which enable a wealth of investigations in physics material science biology chemistry environmental sciences and beyond The next generation radiation sources namely diffraction limited storage rings DLSR and high repetition rate FELs operated in the continuous wave CW mode not only offer brilliant opportunities for research but also pose new challenges and requirements for the X ray detectors required to exploit them fully Examples include the high count rate capability required at the DLSRs the ultra high continuous frame rate and data throughput at the FELs and a broad photon energy range from tens of eV to hundreds of keV spanned by the facilities In order to meet the new requirements posed by the most advanced photon science facilities envisioned or already under development around the world today various novel photon detection and imaging concepts are being investigated and detector technologies are advancing fast The goal of this research topic is to address the challenges and discuss the critical problems encountered in imaging systems for photon science including but not limited to sensing materials ASICs readout electronics detector systems and data reduction Moreover it will encompass a discussion of the development strategies technological advances and recent achievements of each subject thereby facilitating the realization of complete concepts for novel imaging systems as well as further developments of individual detector technologies

Building Global Infrastructure Dale S. Rothman,2014 Building Global Infrastructure is the fourth in a series of volumes Patterns of Potential Human Progress that uses the International Futures IFs simulation model to explore prospects for human development how development appears to be unfolding globally and locally how we would like it to evolve and how better to assure that we move it in desired directions Earlier volumes addressed the reduction of global poverty the advance of global education and the improvement of global health Volume 4 sets out to tell the story of the future of global infrastructure The approach used in this book focuses on the question of whether individual societies will be able to meet future infrastructure demands Related questions include the following What is the range of realistically conceivable futures for infrastructure considering both demand and supply How are the demands for infrastructure balanced with the ability to meet these demands thereby linking the physical and financial treatment of infrastructure What are the effects of providing for infrastructure on issues such as economic productivity and health
