IEEE/ACM International Symposium on Cluster Computing and the Grid Rajkumar Buyya, George M. Mohay, Paul Roe, 2001
Annotation This collection of 85 papers from the May 2001 symposium presents developments in cluster and grid computing that enable applications to share resources and content across the Internet in a peer to peer manner. The main areas of discussion are component and agent approaches, input output and databases, message passing, scheduling and distributed shared memory. Some of the topics are design of a generic platform for scalable cluster computing based on middleware techniques, early experiences with the EGrid testbed, software environments for cluster based display systems, the performance of CORBA for distributed and grid applications, sabotage tolerance mechanisms for volunteer computing systems and a tool kit for the simulation of application scheduling.
