Question 1 --- 1 point

Case Study #1: Autonomic Nervous System

The autonomic nervous system (ANS or visceral nervous system) is a part of the peripheral nervous system. The two major divisions are the sympathetic (fight and flight) and the parasympathetic (rest and digest) systems. Afferent neurons carry impulses from all the organs of the body to controlling centers in the central nervous system. This results in reflexive (largely subconscious) responses that help maintain proper function and homeostasis in variables such as heart rate, digestion, respiration rate, salivation, perspiration, diameter of the pupils, micturition (urination), and sexual arousal. A good understanding of the ANS can prepare you to predict responses of the body to a variety of stimuli (including drugs and disease).

This lab requires you to use an article about the autonomic nervous system to help solve questions for two case study scenarios (one is drug related and the other is disease related). The two case study scenarios are written at the back of the article. The first case study starts on page nine of the article and is about a woman who inhales too much insecticide poison. The second case study starts on page ten of the article and is about a woman with a tumor on her adrenal medulla. Please feel free to research on the internet and use any other study materials you find useful as you gather information to answer these case study questions. Go to the [Autonomic Nervous System Case Study](#) (links to an external site) to go through a quick tutorial that will give you good advice on how to navigate and complete this case study. The article, "[Physiology of the Autonomic Nervous System](#)" (links to an external site) is what you will be using for this case study.

Please enter the answers to all of the case study questions in the article in the text boxes provided below.

Case #1: Insecticide Poisoning

CD is a 44-year-old woman who had spent much of the day working in her garden. A blustery wind caused her to unintentionally inhale the insecticide that she was spraying throughout the garden. When she began wheezing severely, she was taken to the emergency room. The
