Hiebert, 2011-03-19 This integration of earlier and new scholarship reconceptualizes the origins of civilization challenging the received view that the ancient Near East spawned the spread of civilization outward from Mesopotamia to all other neighboring cultures Central Asia is here shown to have been a major player in the development of cities Skillfully documenting the different phases of both Soviet and earlier Western external analyses along with recent excavation results this new interpretation reveals Central Asia's role in the socioeconomic and political processes linked to both the Iranian Plateau and the Indus Valley showing how it contributed substantively to the origins of urbanism in the Old World Hiebert's research at Anau and his focus on the Chalcolithic levels provide an essential starting point for understanding both the nature of village life and the historical trajectories that resulted in Bronze Age urbanism University Museum Monograph 116      *The Bronze Age and Early Iron Age Peoples of Eastern Central Asia: Archeology, migration and nomadism, linguistics* Victor H. Mair, 1998      **Treasures from the Oxus** Massimo Vidale, 2017-06-21 In history this grand arterial 1500 mile waterway was always seen as the natural frontier between the northern provinces of the Iranian empires and the outer Turanian lands It was for centuries central to Achaemenid and later Persian power But as the author shows it has a prehistory which goes very much further back and a succession of skilled yet still elusive Bronze Age cultures flourished here well before the rise of Cyrus the Great in the 6th century BCE This richly illustrated book explores the fascinating history art and archaeology of the region including its primal trade in silk and foodstuffs the mineral wealth of the Oxus basin its exotic myths and beliefs and the converging tribes and peoples which led to a new stability economic growth and urbanism The volume contains 150 full colour photographs of notable artefacts including silver decorated vessels inlaid stone pots agate beads and 25 Bactrian Princesses remarkable statuettes made in chlorite and limestone Most of these rare objects have never been seen let alone published before      *The Making of Bronze Age Eurasia* Philip L. Kohl, 2007-01-22 This book provides an overview of Bronze Age societies of Western Eurasia through an investigation of the archaeological record The Making of Bronze Age Eurasia outlines the long term

processes and patterns of interaction that link these groups together in a shared historical trajectory of development Interactions took the form of the exchange of raw materials and finished goods the spread and sharing of technologies and the movements of peoples from one region to another Kohl reconstructs economic activities from subsistence practices to the production and exchange of metals and other materials Kohl also argues forcefully that the main task of the archaeologist should be to write culture history on a spatially and temporally grand scale in an effort to detect large macrohistorical processes of interaction and shared development
