Bergman's book examines the current state of mixed methods research, exploring exciting new ways of conceptualizing and conducting empirical research in the social and health sciences. Contributions from the world's leading experts in qualitative, quantitative and mixed methods approaches are brought together, clearing the way for a more constructive approach to social research. These contributions cover the main practical and methodological issues and include a number of different visions of what mixed methods research is. The discussion also covers the use of mixed methods in a diverse range of fields including sociology, education, politics, psychology, computational science and methodology. This book represents an important contribution to the ongoing debate surrounding the use of mixed methods in the social sciences and health research and presents a convincing argument that the conventional paradigmatic view of qualitative and quantitative research is outdated and in need of replacement. It will be essential reading for anyone actively engaged in qualitative, quantitative and mixed methods research and for students of social research methods. 1500 pages *Digital Media and Reporting Conflict* Daniel Bennett, 2013-07-18 This book explores the impact of new forms of online reporting on the BBC's coverage of war and terrorism. Informed by the views of over 100 BBC staff at all levels of the corporation, Bennett captures journalists shifting attitudes towards blogs and internet sources used to cover wars and other conflicts. He argues that the BBC's practices and values are fundamentally evolving in response to the challenges of immediate digital publication. Ongoing challenges for journalism in the online media environment are identified: maintaining impartiality in the face of calls for more open personal journalism; ensuring accuracy when the power of the former audience allows news to break at speed; and overcoming the limits of the scale of the BBC's news operation in order to meet the demands to present news as conversation. While the focus of the book is on the BBC's coverage of war and terrorism, the conclusions are more widely relevant to the evolving practice of journalism at traditional media organizations as they grapple with a revolution in publication.

Mixed Methods in Criminology Vicky Heap, Jaime Waters, 2019-01-10 *Mixed Methods in Criminology* is the first book to bring together the discipline of criminology with the mixed methods research strategy which has become increasingly prominent within criminological teaching and research. The book is structured so that it charts the course of a criminological mixed methods study. Starting with an introduction to mixed methods and its implications for criminology and criminological research, the book then works systematically through the planning stages of a research project. Developing research questions, aims and objectives is discussed alongside literature searching skills and the project planning process. Before the principles and practice of ethical research are summarised, next come chapters on philosophy, mixed methods design, combining the data, research design and sampling, data collection methods and data analysis, delivering a comprehensive overview of how to undertake a mixed methods research project in practice. This is followed by a chapter on troubleshooting which provides useful advice from experienced mixed methods researchers. Before a detailed account of how to write up mixed methods research is presented, the book concludes with a range of real life mixed methods case studies to demonstrate how the techniques outlined in this book have been employed in reality and to inspire new criminological mixed methods projects. Providing straightforward, easy to follow guidance, *Mixed Methods in Criminology* is the essential student companion for any criminological mixed methods research project. Drawing on the authors' years of experience teaching research methods, the book is written in a supportive and encouraging tone that will serve as a reference and guide for those embarking on their adventures in the field.
