*The Coddling of the American Mind* Greg Lukianoff, Jonathan Haidt, 2018-09-04 New York Times Bestseller Finalist for the 2018 National Book Critics Circle Award in Nonfiction A New York Times Notable Book Bloomberg Best Book of 2018 One of Bill Gates s Top Five Books of All Time Their distinctive contribution to the higher education debate is to meet safetyism on its own psychological turf Lukianoff and Haidt tell us that safetyism undermines the freedom of inquiry and speech that are indispensable to universities Jonathan Marks Commentary The remedies the book outlines should be considered on college campuses among parents of current and future students and by anyone longing for a more sane society Pittsburgh Post Gazette Something has been going wrong on many college campuses in the last few years Speakers are shouted down Students and professors say they are walking on eggshells and are afraid to speak honestly Rates of anxiety depression and suicide are rising on campus as well as nationally How did this happen First Amendment expert Greg Lukianoff and social psychologist Jonathan Haidt author of *The Anxious Generation* show how the new problems on campus have their origins in three terrible ideas that have become increasingly woven into American childhood and education What doesn t kill you makes

you weaker always trust your feelings and life is a battle between good people and evil people These three Great Untruths contradict basic psychological principles about well being and ancient wisdom from many cultures Embracing these untruths and the resulting culture of safetyism interferes with young people s social emotional and intellectual development It makes it harder for them to become autonomous adults who are able to navigate the bumpy road of life Lukianoff and Haidt investigate the many social trends that have intersected to promote the spread of these untruths They explore changes in childhood such as the rise of fearful parenting the decline of unsupervised child directed play and the new world of social media that has engulfed teenagers in the last decade They examine changes on campus including the corporatization of universities and the emergence of new ideas about identity and justice They situate the conflicts on campus within the context of America s rapidly rising political polarization and dysfunction This is a book for anyone who is confused by what is happening on college campuses today or has children or is concerned about the growing inability of Americans to live work and cooperate across party lines

The Politics of Recognition in the Age of Digital Spaces Benjamin JJ Carpenter,2023-09-15 This book provides a philosophical analysis of the notion of selfhood that underlies identity politics It offers a unique theory of the self that combines previous scholarly work on recognition and the phenomenology of space The politics of identity occupy the centre of a contested terrain Marginalised and oppressed peoples continue to seek the transformation of our shared social world and our political institutions required for their lives to be liveable Public criticism and academic treatments of identity politics often take a disparaging view that treats it as subordinate to more general political questions about justice and the organisation of society and its institutions This book argues that these polemics ignore the numerous ways in which all politics is concerned with matters of selfhood and identity Through a rereading of Hegel s account of recognition as an ongoing and dynamic process that constitutes the self it presents selves and the categories of identity that qualify these selves as fundamentally conditioned by the environments in which they appear before themselves and others It also argues that we do the work of identity in public spaces particularly digital spaces and that these spaces shape what identities we can assume and what those identities mean Contemporary social media technologies facilitate the production of particular forms of selfhood through the combined logics of the interface the profile and the post The Politics of Recognition in the Age of Digital Spaces will be of interest to scholars and advanced students working in a wide range of disciplines including political philosophy phenomenology philosophy of technology sociology political theory and critical theory It will also appeal to anyone with an interest in contemporary identity politics whether as a matter of study or lived experience
