**Metanoia** Adam Ellwanger, 2020-02-25 Western culture is in a moment when wholly new kinds of personal transformations are possible but authentic transformation requires both personal testimony and public recognition. In this book Adam Ellwanger takes a distinctly rhetorical approach to analyzing how the personal and the public relate to an individual's transformation and develops a new vocabulary that enables a critical assessment of the concept of authenticity. The concept of metanoia is central to this project. Charting the history of metanoia from its original use in the classical tradition to its adoption by early Christians as a term for religious conversion, Ellwanger shows that metanoia involves a change within a person that results in a truer version of him or herself, a change in character or ethos. He then applies this theory to our contemporary moment, finding that metanoia provides unique insight into modern forms of self transformation. Drawing on ancient and medieval sources including Thucydides, Plato, Paul the Apostle and Augustine as well as contemporary discourses of self transformation such as the public testimonies of Caitlyn Jenner and Rachel Dolezal, Ellwanger elucidates the role of language in signifying and authenticating identity. Timely and original, Ellwanger's study formulates a transhistorical theory of personal transformation that will be of interest to scholars working in social theory, philosophy, rhetoric and the history of Christianity.

**Terrorizing Gender** Mia Fischer,2019-11-01 The increased visibility of transgender people in mainstream media exemplified by Time magazine s declaration that 2014 marked a transgender tipping point was widely believed to signal a civil rights breakthrough for trans communities in the United States In Terrorizing Gender Mia Fischer challenges this narrative of progress bringing together transgender queer critical race legal surveillance and media studies to analyze the cases of Chelsea Manning CeCe McDonald and Monica Jones Tracing how media and state actors collude in the violent disciplining of these trans women Fischer exposes the traps of visibility by illustrating that dominant representations of trans people as deceptive deviant and threatening are integral to justifying normalizing and reinforcing the state sanctioned violence enacted against them The heightened visibility of transgender people Fischer argues has actually occasioned a conservative backlash characterized by the increased surveillance of trans people by the security state evident in debates over bathroom access laws the trans military ban and the rescission of federal protections for transgender students and workers Terrorizing Gender concludes that the current moment of trans visibility constitutes a contingent cultural and national belonging given the gendered and racialized violence that the state continues to enact against trans communities particularly those of color
