... in Embroidery, or like for me, to be given you. You will  
see as I have written, as I do it myself, this drawing  
gives you a sketch for this, as I do it myself. If  
you like to do it, or if you like to get it done  
as a gift, or a present, in any respects, even if  
the work, as I have written, is not in Paris, get  
the embroidery done, and give it to me, and  
I will give it, as it is, as a present, for a present.

*Decision Sciences* Raghu Nandan Sengupta, Aparna Gupta, Joydeep Dutta, 2016-11-30 This handbook is an endeavour to cover many current relevant and essential topics related to decision sciences in a scientific manner. Using this handbook graduate students, researchers, as well as practitioners from engineering, statistics, sociology, economics, etc. will find a new and refreshing paradigm shift as to how these topics can be put to use beneficially. Starting from the basics to advanced concepts, authors hope to make the readers well aware of the different theoretical and practical ideas which are the focus of study in decision sciences nowadays. It includes an excellent bibliography, reference journal list, information about a variety of datasets, illustrated pseudo codes, and discussion of future trends in research. Covering topics ranging from optimization networks and games, multi-objective optimization, inventory theory, statistical methods, artificial neural networks, time series analysis, simulation modeling, decision support system, data envelopment analysis, queueing theory, etc. this reference book is an attempt to make this area more meaningful for varied readers. Noteworthy features of this handbook are in-depth coverage of different topics, solved practical examples, unique datasets for a variety of examples in the areas of decision sciences, in-depth analysis of problems through colored charts, 3D diagrams, and discussions about software.

*Ant Colony Optimization* Marco Dorigo, Thomas Stutzle, 2004-06-04 An overview of the rapidly growing field of ant colony optimization that describes theoretical findings, the major algorithms, and current applications. The complex social behaviors of ants have been much studied by science and computer scientists are now finding that these behavior patterns can provide models for solving difficult combinatorial optimization problems. The attempt to develop algorithms inspired by one aspect of ant behavior, the ability to find what computer scientists would call shortest paths, has become the field of ant colony optimization (ACO), the most successful and widely recognized algorithmic technique based on ant behavior. This book presents an overview of this rapidly growing field from its theoretical inception to practical applications, including descriptions of many available ACO algorithms and their uses. The book first describes the translation of observed ant behavior into working optimization algorithms. The ant colony metaheuristic is then introduced and viewed in the general context of combinatorial optimization. This is followed by a detailed description and guide to all major ACO algorithms and a report on current theoretical findings. The book surveys ACO applications now in use, including routing, assignment, scheduling, subset, machine learning, and bioinformatics problems. AntNet, an ACO algorithm designed for the network routing problem, is described in detail. The authors conclude by summarizing the progress in the field and outlining future research directions. Each chapter ends with bibliographic material, bullet points setting out important ideas covered in the chapter, and exercises. *Ant Colony Optimization* will be of interest to academic and industry researchers, graduate students, and practitioners who wish to learn how to implement ACO algorithms.

*Machine Learning and Metaheuristics Algorithms, and Applications* Sabu M. Thampi, Ljiljana Trajkovic, Kuan-Ching Li, Swagatam Das, Michal Wozniak, Stefano Berretti, 2020-04-04 This book constitutes the refereed

proceedings of the First Symposium on Machine Learning and Metaheuristics Algorithms and Applications SoMMA 2019 held in Trivandrum India in December 2019 The 17 full papers and 6 short papers presented in this volume were thoroughly reviewed and selected from 53 qualified submissions The papers cover such topics as machine learning artificial intelligence Internet of Things modeling and simulation distributed computing methodologies computer graphics etc
