Body Invaders Arthritis:

Washing the Brain □ Metaphor and Hidden Ideology Andrew Goatly, 2007-01-17 Contemporary metaphor theory has recently begun to address the relation between metaphor culture and ideology In this wide ranging book Andrew Goatly using lexical data from his database Metalude investigates how conceptual metaphor themes construct our thinking and social behaviour in fields as diverse as architecture engineering education genetics ecology economics politics industrial time management medicine immigration race and sex He argues that metaphor themes are created not only through the universal body but also through cultural experience so that an apparently universal metaphor such as event structure as realized in English grammar is in fact culturally relative compared with e g the construal of cause and effect in the Algonquin language Blackfoot Moreover event structure as a model is both scientifically reactionary and as the basis for technological mega projects has proved environmentally harmful Furthermore the ideologies of early capitalism created or exploited a selection of metaphor themes historically traceable through Hobbes Hume Smith Malthus and Darwin These metaphorical concepts support neo Darwinian and neo conservative ideologies apparent at the beginning of the 21st century ideologies underpinning our social and environmental crises The conclusion therefore recommends skepticism of metaphor s reductionist tendencies

Life Begins at 65 Matthew E. McLaren, 2008-10-09 The words prostate cancer overheard in casual conversation are enough to cause the average male to cringe To actually be diagnosed with this condition is to many a devastating blow from which they never recover neither emotionally nor physically Matthew McLaren received the blow and turned it into a twofold opportunity First he overcame his own cancer Secondly he gave us detailed roadmaps so that others in the same situation can find their way out of it or better yet to bypass the quagmire entirely by taking simple preventative measures This book is must reading both for anyone who has prostate cancer or wishes to prevent it and for anyone who treats this condition or dispenses information about it Within these covers Matthew has created a virtual encyclopedia of the etiology anatomy physiology biochemistry and treatments of prostate cancer written in a style that is easy to understand by lay people and thorough enough for practitioners He interweaves science and personal experience in a delightful way The theme of this book is self empowerment Our body comes with its own innate healing power It can cure itself of any condition provided we give it the conditions it needs to do so and in a timely manner Matthew details what those conditions are Much of the wisdom he expresses herein applies not only to prostate cancer but also to other forms of cancer and to disease in general
