important collection include new concepts and challenges for sustainable green space development emerging from the pressure caused by urbanisation. The concept of biophilic urbanism and the framework of urban ecosystem services are introduced and referred to by applications in different case studies in Europe. Case studies also refer to the current challenges for biodiversity in different urban spaces. These spaces include the urban garden and school environments. Important human species interactions are identified by analysing the allergenic potential of urban trees in a US city. Anthropogenic influences on the survival or local extinction of species are examined in a Mediterranean urban area. In all articles the importance of urban planning on green infrastructure development, biodiversity conservation and management within the urban ecosystem is highlighted and planning recommendations are given. **CORP 2012 -**

Proceedings/Tagungsband Manfred Schrenk, Peter Zeile, Vasily V. Popovich, Pietro Elisei, 2012 RE MIXING THE CITY Towards Sustainability and Resilience. There is nothing permanent except change. Heraclitus. Cities worldwide are facing rapid social, economic, environmental, technological and cultural changes such as rapid urbanisation, aging of society, security issues, housing emergency, new solutions on mobility, integration of immigrants, food and water shortage, etc. Especially in times of economic crisis and demographic changes in cities, it is necessary to think about how to best handle what we have and therefore RE MIXING THE CITY is a challenge to manage and recombine the elements which make our modern cities in order to better respond to change. *Urban Ecology* Kimberly Etingoff, 2021-03-31. This title includes a number of Open Access chapters. *Urban Ecology Strategies for Green Infrastructure and Land Use* provides background on issues relating to urban ecology and urban natural processes. The first section covers the types, values and recognition of ecosystem services provided by natural processes in urban. *Economics and Land Use Planning* Alan W. Evans, 2008-04-15. The book's aim is to draw together the economics literature relating to planning and set it out systematically. It analyses the economics of land use planning and the relationship between economics and planning and addresses questions like: What are the limits of land use planning and the extent of its objectives? Is the aim aesthetic? Is it efficiency? Is it to ensure equity? Or sustainability? And if all of these aims, how should one be balanced against another?
