

Towards sustainable management of land and soil

Europe's land and soil face a number of pressures, including urban expansion, contamination from agriculture and industry, soil sealing, landscape fragmentation, low crop diversity, soil erosion and extreme weather events linked to climate change.

Greater cities with cleaner energy and transport systems, a green infrastructure connecting green areas, less intensive sustainable agricultural practices can help make Europe's land use more sustainable and soils healthier.

Land Use Environment And Social Change:

Land Use, Environment, and Social Change Richard White, 2000-12-01 Whidbey and Camano two of the largest of the numerous beautiful islands dotting Puget Sound together form the major part of Island Country Taking this county as a case study and following its history from Indian times to the present Richard White explores the complex relationship between human induced environmental change and social change This new edition of his classic study includes a new preface by the author and a foreword by William Cronon *A Brief History of Vashon Island* Bruce Haulman, 2016-05-09 Reachable only by ferry Vashon Island is a breathtaking rural retreat from the bustling activity of nearby Seattle and Tacoma The island's first inhabitants the Sx'bab took advantage of its evergreen forests and rich marine resources In 1792 George Vancouver was the first Anglo to discover the island and named it after Captain James Vashon By the late 1800s the first white settlers had established farms and greenhouses that supplied nearby cities with berries tomatoes and cucumbers Ferries drove development in the later half of the century introducing new industries and tourism to the area While both influenced by and isolated from the mainland the island developed its own unique character treasured by locals Merging human and natural history author Bruce Haulman presents the rich heritage of this thriving community Contested Boundaries David J. When Money Grew on Trees Greg Gordon, 2014-04-02 Born in the timber colony of New Brunswick Maine in 1848 Andrew Benoni Hammond got off to an inauspicious start as a teenage lumberjack By his death in 1934 Hammond had built an empire of wood that stretched from Puget Sound to Arizona and in the process had reshaped the American West and the nation's way of doing business When Money Grew on Trees follows Hammond from the rough and tumble world of mid nineteenth century New Brunswick to frontier Montana and the forests of Northern California from lowly lumberjack to unrivaled timber baron Although he began his career as a pioneer entrepreneur Hammond unlike many of his associates successfully negotiated the transition to corporate businessman Against the backdrop of western expansion and nation

building his life dramatically demonstrates how individuals more than the impersonal forces of political economy shaped capitalism in this country and in doing so transformed the forests of the West from functioning natural ecosystems into industrial landscapes In revealing Hammond s instrumental role in converting the nation s public domain into private wealth historian Greg Gordon also shows how the struggle over natural resources gave rise to the two most pervasive forces in modern American life the federal government and the modern corporation Combining environmental labor and business history with biography When Money Grew on Trees challenges the conventional view that the development and exploitation of the western United States was dictated from the East Coast The West Gordon suggests was perfectly capable of exploiting itself and in his book we see how Hammond and other regional entrepreneurs dammed rivers logged forests and leveled mountains in just a few decades Hammond and his like also built cities towns and a vast transportation network of steamships and railroads to export natural resources and import manufactured goods In short they established much of the modern American state and economy The Pacific Raincoast Robert Bunting,1997 This work chronicles the struggle for the Douglas fir region from the first sustained contact between native American and Euro American cultures to 1900 when Fredrick Weyerhaeuser s purchase of some of the area completed one of the largest land deals in US history Colony and Empire William G. Robbins,1994 Popular writers and historians alike have perpetuated the powerful myth of the rugged individualist single handedly transforming the American West In reality William Robbins counters it was the Guggenheims and Goulds the Harrimans and Hearsts and the Morgans and Mellons who masterminded what the West was to become Remove the romance he shows and a darker West emerges a colonial like region where industrial statesmen aided by eastern U S and European capital manipulated investments in pursuit of private gain while controlling wage earning cowboys and miners Robbins argues that understanding the impact of capitalism on the West from the fur trade era to the present is essential to understanding power influence and change in the region Showing how global capitalism had a more profound impact on the modern West than individual initiative he explores violence and racism along the Texas Mexican border colonial style company towns in Montana and the Northwest contrasting traditions astride the U S Canadian boundary pace setting agribusiness and exploitation of labor in California the growing power of metropolitan centers and dependence of rural areas and the emergence of a sizable federal influence To grasp the essence of the West s dramatic transformation Robbins contends you must look to the mainstays of material relations in the region the perpetually changing character of political and economic culture the inherent instability of resources and the larger constellations of capitalist decision making Consequently he shows shy Western success and failure prosperity and misfortune and expansion and decline were all inseparably linked to the evolution of capitalism at the local regional national and global levels In the tradition of Patricia Nelson Limerick s Legacy of Conquest Robbins s study challenges some of our most revered images of the West and invigorates the ongoing debates over its history and meaning for our nation Red Lodge and the Mythic West Bonnie

Christensen, 2002 Tracing the story of Red Lodge from the 1880s to the present Christensen tells how a mining town managed to endure the vagaries of the West's unpredictable extractive industries economy She connects Red Lodge to a myriad of larger events and historical forces to show how national and regional influences have contributed to the development of local identities exploring how and why westerners first rejected and then embraced western images and how ethnicity wilderness and historic preservation became part of the identity that defined one town **BOOK JACKET** Trails Patricia Nelson Limerick, Clyde A. Platt, 2004-06-18 Land Use and Society is a unique and compelling exploration of interactions among law geography history and culture and their joint influence on the evolution of land use and urban form in the United States Originally published in 1996 this completely revised expanded and updated edition retains the strengths of the earlier version while introducing a host of new topics and insights on the twenty first century metropolis This new edition of Land Use and Society devotes greater attention to urban land use and related social issues with two new chapters tracing American city and metropolitan change over the twentieth century More emphasis is given to social justice and the environmental movement and their respective roles in shaping land use and policy in recent decades This edition of Land Use and Society by Rutherford H Platt is updated to reflect the 2000 Census the most recent Supreme Court decisions and various topics of current interest such as affordable housing protecting urban water supplies urban biodiversity and ecological cities It also includes an updated conclusion that summarizes some positive and negative outcomes of urban land policies to date **Watering the Valley** James Earl Sherow, 1990 Sherow documents the attempts of the inhabitants of the High Plains section of the Arkansas River Valley to bring the river under control the waves of new problems that followed each new solution and the conflict and cooperation the process engendered **Outdoor Recreation and Environmental Quality** Phillip O. Mahoney, Wendy Jean Katz, 2008 Although the framework of regionalist studies may seem to be crumbling under the weight of increasing globalization this collection of seventeen essays makes clear that cultivating regionalism lies at the center of the humanist endeavor With interdisciplinary contributions from poets and fiction writers literary historians musicologists and historians of architecture agriculture and women this volume implements some of the most innovative and intriguing approaches to the history and value of regionalism as a category for investigation in the humanities In the volume's inaugural essay Annie Proulx discusses landscapes in American fiction comments on how she constructs characters and interprets current literary trends Edward Watts offers a theory of region that argues for comparisons of the United States to other former colonies of Great Britain including New Zealand Australia and Canada Whether considering a writer's connection to region or the idea of place in

exploring what is meant by regionalism these essays uncover an enduring and evolving concept Although the approaches and disciplines vary all are framed within the fundamental premise of the humanities the search to understand what it means to be human
