Stephen Jagusch, 2017-11-03 Global Arbitration Review s Guide to Advocacy is a practical book for specialists and would be specialists on how to be persuasive during international arbitration featuring unique insight from well known arbitrators on advocacy The fully revised Second Edition is a useful tool for junior lawyers who wish to develop their advocacy skills as well as a manual for civil trained lawyers who would like to feel more at ease with cross examination as it breaks the arbitral process into key steps and explains the advocacy opportunity that each represents focusing on the principles at work rather than specifics Woven throughout are gems from big name arbitrators tips complaints musings and reminiscences providing a new 360 degree view of written and oral submissions The Second Edition contains several new chapters and a fresh tranche of arbitrator contributions While the first edition covers the basics through chapters on inter alia written submissions cross examination opening submissions and closing arguments this second edition delves deeper by exploring Cultural

Otto, Chiara Vargiu, 2025-07-25 The Psychology of Attack Politics explores the use of political attacks in election campaigns and the way in which their often deliberate use impacts voters and has wide reaching societal consequences With most elections being fraught with tension disrespectful treatment of political opponents and political incivility this timely book aims to disentangle the dynamics of how attack politics is perceived e g whether citizens perceive a negative message to be indeed negative and evaluated i e whether citizens like or dislike attack politics The book also looks at the effects of attack politics for instance whether exposure to negative or uncivil messages alters attitudes and behaviors such as turnout affective polarization and support for political violence The authors provide a systematic conceptualization of attack politics made up of negativity incivility and intolerance Focusing on cutting edge research in political psychology political

communication and electoral behavior the authors make the central argument that to understand the effects of different forms of attack politics there should be a strong focus on individual differences in message perception and evaluation Exploring what ultimately drives the effects of negative uncivil and intolerant rhetoric and analyzing the phenomena at the center of current scientific and public discourse this is a fascinating reading for academics and students in psychology political science sociology and communication as well as anyone interested in political campaigning and elections
