OPERATION

WARNING: "SAFETY-OFF SWITCH"

May result in serious injury or death. The rocker on the device may have been configured to operate another fan other than the one switched off by the Safety-Off. Before replacing the fan, verify that the wires to the fan do not have power by turning the fan ON. If the fan turns off when the Safety-Off is activated, it is safe to replace the fan.

SETUP AND COMMUNICATION

After installation, the Ceiling Fan Controller will immediately allow the lamp to function. To control the fan wirelessly, it will need to be added to the free@home network. Detailed information about setup is available in the technical reference manual and the online help for the System Access Point at www.abb.com/us/freeathome.

1. To complete setup, you will need the ABB-free@home System Access Point (SysAP) and a computer (tablet, laptop, or desktop computer).
2. Walls, ceilings, and electrical equipment can affect wireless communication, especially steel reinforcements or other large metal objects. Electrical devices that send high-frequency signals (such as computers, wireless routers, audio systems, and video systems) should be at least 3 feet from this device.
3. When first powered, the device is in discovery mode for 30 minutes. This time period allows the SysAP to see and connect to the device. During this time, the user can login to the SysAP and add the device to the free@home network.
4. After 30 minutes, the device will automatically exit discovery mode. To re-enter discovery mode, the user must turn the power OFF and back ON again. This will place the device in discovery mode for another 30 minutes.
5. Once a device has been added to a network, it will no longer enter discovery mode at power-up. To add the device to a new network, the user must first force the device to forget its existing network by resetting it back to factory settings. This takes two people to do safely.

Follow these steps to reset:

- A) Turn the power OFF at the circuit breaker.
- B) Turn the power ON at the circuit breaker while pressing the bottom half of the rocker for at least 15 seconds, until the LED light stops flashing.
- C) Return to steps 3-4 of SETUP AND COMMUNICATION to connect the device to a new network.

Codes

Install according to national and local electrical codes.

Grounding

When there is no ground connection in the wall box, the National Electrical Code (NEC) allows a control to be installed as a replacement ONLY if: (1) a non-metal, non-burning faceplate is attached with non-metal screws, OR (2) the circuit is protected by a ground fault circuit interrupter (GFCI). When installing a control, be sure to cap or remove the green wire before screwing the control into the wall box.

Cleaning

To clean, wipe with a clean damp cloth. DO NOT use any chemical cleaning solutions.
