[A New Garden Ethic](#) Benjamin Vogt, 2017-09-01 In a time of climate change and mass extinction, how we garden matters more than ever. An outstanding and deeply passionate book, Marc Bekoff author of *The Emotional Lives of Animals*. Plenty of books tell home gardeners and professional landscape designers how to garden sustainably what plants to use and what resources to explore. Yet few examine why our urban wildlife gardens matter so much not just for ourselves but for the larger human and animal communities. Our landscapes push aside wildlife and in turn diminish our genetically programmed love for wildness. How can we get ourselves back into balance through gardens to speak life's language and learn from other species? Benjamin Vogt addresses why we need a new garden ethic and why we urgently need wildness in our daily lives. Lives sequestered in buildings surrounded by monocultures of lawn and concrete that significantly harm our physical and mental health. He examines the psychological issues around climate change and mass extinction as a way to understand how we are short circuiting our response to global crises especially by not growing native plants in our gardens. Simply put, environmentalism is not political; it's social justice for all species marginalized today and for those facing extinction tomorrow. By thinking deeply and honestly about our built landscapes, we can create a compassionate activism that connects us more profoundly to nature and to one another.

[Nature Obscura](#) Kelly Brenner, 2020-02-26 Brenner's smart debut is ideal for those with a deep interest in nature. Publishers Weekly PNBA Book Awards finalist. Washington State Book Awards finalist. With wonder and a sense of humor, *Nature Obscura* author Kelly Brenner aims to help us rediscover our connection to the natural world that is just outside our front door. We just need to know where to look. Through explorations of a rich and varied urban landscape, Brenner reveals the complex micro habitats and surprising nature found in the middle of a city. In her hometown of Seattle, which has plowed down hills, cut through the land to connect fresh and saltwater, and paved over much of the rest, she exposes a diverse range of strange and unknown creatures. From shore to wetland forest to neighborhood park and graveyard to backyard, Brenner uncovers how our land alterations have impacted

nature for good and bad through the wildlife and plants that live alongside us often unseen These stories meld together in the same way our ecosystems species and human history are interconnected across the urban environment
