Rationalist Traces Andrew Peckham, Torsten Schmiedeknecht, Charles Rattray, 2007-10-22 Modern European architecture has been characterised by a strong undercurrent of rationalist thought Rationalist Traces aims to examine this legacy by establishing a cross section of contemporary European architecture placed in selected national contexts by critics including Kos Moravnszky and Josep

Maria Montaner Subsequent interviews discuss the theoretical contributions of Giorgio Grassi and OM Ungers and a survey of Max Dudler and De Architekten Cie's work sets out a consistency at one remove from avant garde spectacle or everyday expediency In Germany Rationalism offers a considered representation of state institutions while elsewhere outstanding work reveals different approaches to rationality in architecture often recalling canonical Modernism or the Rational Architecture of the later postwar period Whether evident in patterns of thinking a particular formal repertoire a prevailing consistency or exemplified in individual buildings this relationship informs the mature work of Patrick Berger Claus en Kaan Architekten Carlos Ferrater Cino Zucchi or Hans Kollhoff The buildings and projects of a younger generation Javier Garc a Solera GWJ Architekten AG big Andrea Bassi or Beniamino Servino present a Rationalism less conditioned by a concern to promote a unifying aesthetic While often sharing a deliberate economy of means or a sensual sobriety they present a more oblique or distanced relationship with the defining work of the 20th century
