theoretical research framework addressed in through a multidisciplinary approach. Consequently, we should move away from the static theoretical approaches to the problem, that focus on cognitive mechanisms, and move to a dynamic approach to address this issue. Experimental and empirical studies should consider the cognitive process from a dynamic perspective, and also explore the relationship between the cognitive process and the social context.

Phenomena are unpredictable anomalies that occur for various geological, biological, chemical, or human-made causes. The following phenomena have been observed on the Shallowwater Plateau and I am listing the following alphabetically. All observations have been made possible and are done in concert with government agencies and/or author's own personal knowledge and observations. Many of these phenomena have been observed elsewhere in the world.
