Lecture 1 → Introduction to Biological Science

Tree of Life

- Domains
 - Eukarya → visible life
 - Split into animals and plants
 - Very small portion
 - Bacteria → single cell
 - Make up most of life's branches
 - Symbionts that evolved into mitochondria and chloroplasts were eubacteria
 - Archaea → original domain of life
 - More closely related to eukaryotes than eubacteria, first branch of life
 - Basic split between archaea and bacteria
- Candidate phyla radiation: Single species have been identified, each identifies an entire phylum which is yet to be understood - pioneer species (tree is dominated by new species that scientists have never seen before)
- Species disappearing faster than can be recovered
- Eukaryotes and archaea are most closely related branches

Destruction and Mass Extinction

- One million species face imminent extinction because of humans
- Recent past → >50% vertebrates/>75% flying insects lost in the past <50 years
- Critically threatened → >40% amphibians, >30% plants/corals/sharks, >25% mammals
- Populations and extinctions have increased

Theory of Evolution

- Evolution: all life on earth evolved from a common ancestor, most properties within cells work in the same way, the change in gene distribution over time within a population
- Theory: a very well substantiated idea that explains many overlapping phenomena at once, wide-ranging, strongest. Not a hypothesis
- Darwin: species arise through random mutation and natural selection for fitness
- Evidence (fewer than 40% of Americans believe in evolution)
 - fossil record shows conservation of homologous structures
 - Molecular proof: same DNA and RNA protein in cells
 - Homologous function in hands and fins → evolved similar mechanisms in appendages
- Scopes Monkey Trial
 - Scopes taught evolution illegally; resulted in Butler Act → forbid teaching evolution in TN
- Endosymbiont theory
 - Single composite cell of greater complexity could evolve from two or more separate simpler living cells in a symbiotic relationship

Year of Earth's History

- 1 Jan: earth formed 4.54 bya by acceleration of material from the solar nebula via gravitational collapse, conditions were incompatible with life, bombarded with asteroid-sized meteors for 800 million years
- 4 Mar: by 3.8 bya bombardment had slowed, Earth had cooled to lower the temps "compatible" with life

Study Guide Biology 1 ,1978 *The American Educational Catalog* ,1920 Conversational Science MCAT(R) Volume 1 Jim Brinegar,2015-07-05 The Conversational Science series is a new or at least different approach to preparing for the latest version of the Medical College Admissions Test This bit is only my personal opinion but I think the easiest way to do well on the MCAT is to understand the material There s one heck of a lot of material though so how should you study the things you ve already covered in class This study guide is written in an informal tone of voice because you and I are having a conversation and not a lecture This study guide contains a limited number of crudely drawn figures You re the person studying for the exam so I ask you to draw the rest of the figures for yourself A figure that you draw yourself even if you have no artistic talent whatsoever teaches you much more than you can learn by simply looking at the beautiful full color professionally drawn figures in your textbooks This study guide has a limited number of review questions so you can check if you really did understand one chapter before you move on to the next This study guide DOES NOT contain any practice exams This is because in my opinion again based on my experience as a student and as an instructor the questions in the practice exams of many study guides are too often confusing poorly written and not at all like the actual questions on the actual exam And sometimes the answers given for some questions on some practice exams are just plain wrong This study guide may not be for everyone but I think there s a good chance it ll help you convince yourself that you really do understand the material Medical College Admissions Test MCAT and MCAT2015 are registered trademarks of the Association of American Medical Colleges which neither sponsors nor endorses this product I took the MCAT way back in the middle of the 1980s and I did very well if I do say so myself Biology Study Guide and Outline Part 1: Cells, Energy, Replication,
