And Intuitive Farmer Inspiring Management Success:

The Intuitive Farmer: Inspiring Management Success Peter Nuthall, 2016-01-06 Successful farm management is based upon excellent decision making by the farm owner In practice most decisions are made intuitively rather than the result of careful data collection and analysis or analysing others views and associated factors Thus the farmer s intuitive decisions have a major impact on the business practices efficiency profitability and success of the farm In the form of a character driven novel the author guides the reader through a series of lessons for farmers to improve their intuitive decision making The story follows Ben a New Zealand farmer as an important member of a discussion group The experimental programme is set up by a management researcher Tom to explore the best way to improve farmers intuition The farmer group has different characters in different situations each one of which leads to interesting dilemmas and lessons Each chapter addresses a different issue affecting farmers such as risk management benchmarking budgeting and planning negotiation skills active listening and farm ownership By the end of the novel the reader will have absorbed important farm management principles and practices through the activities and findings of the group The Intuitive Farmer follows on from successful business management books such as The Goal which communicate business ideas and strategies in novel form This is the first such book applied to agricultural management practices providing a dependable source for farmers agricultural and farm management students and people involved in agriculture industries 5m Books Farm Business Management Peter L. Nuthall, 2018-12-14 The underlying economic factors that effect primary production are frequently studied and written about soil quality animal health climate machinery This book explores the psychology of successful farm business management and decision making Rural SME Business Management Peter L. Nuthall, 2024-12-20 This book is about managerial ability and how it might be assessed and improved and it focuses on rural Small and Medium Enterprises SMEs Traditionally business studies have seldom covered the manager as a person and a decision maker in any great depth Personnel management production economics financing operations analysis techniques etc tend to be emphasized but the personal attributes of the decision makers have as much influence on success as the rules of good decision making This book aims to correct this imbalance The human characteristics of managers that define how a manager operates are explored as are their impact on managerial ability The details of the competencies a manager must possess are also presented and discussed as well as potential detracting biases The book concludes with methods and techniques covering personal characteristic changes and associated managerial improvement The concepts and conclusions of this book are all based on a body of research excerpts of which are quoted in the text drawn from the rich sources available in the international literature Case studies describing successful managers and management advisors are used throughout **Subtle Agroecologies** Julia Wright, 2021-06-29 This book is about the invisible or subtle nature of food and farming and also about the nature of existence Everything that we know and do not know about the physical world has a subtle counterpart which has been scarcely considered in modernist

farming practice and research If you think this book isn't for you if it appears more important to attend to the pressing physical challenges the world is facing before having the luxury of turning to such subtleties then think again For it could be precisely this worldview the one prioritises the physical material dimension of reality that helped get us into this situation in the first place Perhaps we need a different worldview to get us out This book makes a foundational contribution to the discipline of Subtle Agroecologies a nexus of indigenous epistemologies multidisciplinary advances in wave based and ethereal studies and the science of sustainable agriculture Not a farming system in itself Subtle Agroecologies superimposes a non material dimension upon existing materially based agroecological farming systems Bringing together 43 authors from 12 countries and five continents from the natural and social sciences as well as the arts and humanities this multi contributed book introduces the discipline explaining its relevance and potential contribution to the field of Agroecology Research into Subtle Agroecologies may be described as the systematic study of the nature of the invisible world as it relates to the practice of agriculture and to do this through adapting and innovating with research methods in particular with those of a more embodied nature with the overall purpose of bringing and maintaining balance and harmony Such research is an open minded inquiry its grounding being the lived experiences of humans working on and with the land over several thousand years to the present By reclaiming and reinterpreting the perennial relationship between humans and nature the implications would revolutionise agriculture heralding a new wave of more sustainable farming techniques changing our whole relationship with nature to one of real collaboration rather than control and ultimately transforming ourselves

Farm Business Management Peter L. Nuthall, 2021-11-29 Management research has shown successful farmers have quite distinct personal characteristics which most farmers have seldom thought about Farmers who are less successful tend to have processes and systems which are likely to be biased The aim of this book is to help all farmers discover more about these personal attributes that impinge on the success of their management and to show how their attitudes and personal resources can be improved This book is not a straightforward textbook Rather it tells the story of a group of farmers who take part in an expert guided experiment designed to test approaches to improving management skill The group meet at each other's farms to learn about their issues and develop solutions to improving what is called their management style with the aim of removing any identified decision system biases The book covers issues like optimal decision rule systems and how they can become second nature
