Signal ,2013 *The Optimist* Keach Hagey, 2025-05-20 Excellent and deeply reported Tim Wu New York Times Book Review The first major biography of tech's newest titan this sets a high bar for those to follow Publishers Weekly starred review An exemplary blend of biography financial technology reportage and futurology Kirkus starred review From an acclaimed Wall Street Journal reporter comes the first biography of the enigmatic leader of the AI revolution charting his ascent within the tech world as well as his ambitions for this powerful new technology On November 30 2022 OpenAI released ChatGPT a chatbot that captivated the world with its uncanny ability to hold humanlike conversations Not even a year later on November 17 2023 Sam Altman the CEO of OpenAI was summarily fired on a video call by the company's board The firing made headlines around the globe OpenAI is the leader in the race to build AGI artificial general intelligence or AI that can think like a human being and Altman is the most prominent figure in the field Yet it was mere days before Altman was back running the company he had co-founded with most of the directors who voted to fire him themselves removed from the board The episode was a demonstration of how quickly the industry is moving and of Altman's power to bend reality to his will In *The Optimist* the Wall Street Journal reporter Keach Hagey presents the most detailed account yet of Altman's rise from his precocious childhood in St Louis to his first failed startup experience his time as legendary entrepreneur Paul Graham's protégé and successor as head of Y Combinator the start-up accelerator where Altman became the premier power broker in Silicon Valley the founding of OpenAI and his recruitment of a small yet superior team and his struggle to keep his company at the cutting edge while fending off determined rivals including Elon Musk a former friend and now Altman's bitter opponent Hagey conducted more than 250 interviews with Altman's family friends teachers mentors co-founders colleagues investors and portfolio companies in addition to spending hours with Altman himself The person who emerges in her portrait is a brilliant dealmaker with a love of risk who believes in technological progress with an almost religious conviction yet who sometimes moves too fast for the people around him With both the promise and peril of AI increasing by the day Hagey delivers a nuanced balanced revelatory account of the individual who is leading us into what he himself has called the intelligence age Altman is a figure out of Isaac Asimov or Neal Stephenson Or he is the author himself if it feels as though we have all collectively stepped into a science fiction short story it is Altman who is writing it *Law and Regulation of Mobile Payment Systems* Joy Malala, 2017-11-28 Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa In Kenya the introduction of M Pesa a new financial services model has transformed the banking and financial services industry Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts This book

addresses the legal and regulatory issues arising out of the introduction of M Pesa in Kenya and its drive towards financial inclusion. It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools, institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity. This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion. It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing the legal and regulatory issues presented by mobile payments. The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya.

Michigan Manufacturer & Financial Record, 1913. Digital Cityscapes Adriana de Souza e Silva, Daniel M. Sutko, 2009. The convergence of smartphones, GPS, the Internet and social networks has given rise to a playful educational and social media known as location based and hybrid reality games. The essays in this book investigate this new phenomenon and provide a broad overview of the emerging field of location aware mobile games, highlighting critical social scientific and design approaches to these types of games and drawing attention to the social and cultural implications of mobile technologies in contemporary society. With a comprehensive approach that includes theory, design and education, this edited volume is one of the first scholarly works to engage the emerging area of multi-user location based mobile games and hybrid reality games. It is appropriate for undergraduate and graduate courses covering mobile phone or gaming culture, media history and educational technology as well as researchers and the general public.
