## **Book And First Bite How Learn Eat:**

First Bite Bee Wilson, 2015-12-01 Food historian Bee Wilson delves deep into the latest research from food psychologists neuroscientists and nutritionists to reveal that our food habits are shaped by family and culture memory and gender hunger and love We do not come into the world with an innate sense of taste or nutrition as omnivores we have to learn how and what to eat how sweet is too sweet and what food will give us the most energy for the coming day Drawing on the psychology of eating she shows that it is possible despite our dysfunctional food industry and habits to feed ourselves better

of foodiness and to show how this discourse whilst seemingly universal is actually situated in middle class ideas and is therefore more easily taken up by certain schools The book argues that the classed nature of foodiness leads to certain food knowledges becoming marginalized or lost and this then positions some schools in tension with their local communities resulting in widely variant food experiences for children Earl demonstrates how foodiness is taken up in schools by first exploring how the foodscape at school is shaped by policy and media sources The book then examines how foodiness is taken up by schools with different SES profiles by showing how food moves through the school day Asking critical questions on class and poverty that are often overlooked this book will be of interest to researchers academics and students working on food issues related to teaching food policy and schools in the fields of education sociology and food studies It should also be of interest to policymakers parents and teachers
