**Parenting** Marc H. Bornstein,2005-02-16 Despite the fact that most people become parents and everyone who has ever lived  
has had parents parenting remains a mystifying subject about which almost everyone has opinions but about which few  
people agree Striking permutations on the theme of parenting are emerging single parenthood blended families lesbian and  
gay parents and teen versus fifties first time moms and dads Divided into four volumes the Handbook of Parenting is  
concerned with different types of parents basic characteristics of parenting forces that shape parenting problems faced by  
parents and the practical sides of parenting Contributors have worked in different ways toward understanding all of these  
diverse aspects of parenting and look to the most recent research and thinking in the field to shed light on many topics every  
parent has wondered about Because development is too subtle dynamic and intricate to admit that parental caregiving alone  
determines the course and outcome of ontogeny volume 1 concerns how children influence parenting Volume 2 relates  
parenting to its biological roots and sets parenting in its ecological framework Volume 3 distinguishes among the cast of  
characters responsible for parenting and is revealing of the psychological make ups and social interests of those individuals  
Volume 4 describes problems of parenting as well as the promotion of positive parenting practices Written to be read and  
absorbed in a single sitting each chapter addresses a different but central topic in parenting and is rooted in current thinking  
and theory as well as classic and modern research on that topic All chapters follow a standard organization including an  
introduction to the chapter as a whole followed by historical considerations of the topic a discussion of central issues and  
theory a review of classic and modern research forecasts of future directions for theory and research and a conclusion In  
addition to considering their own convictions and research the chapter contributors present and broadly interpret all major
