

- What environmental issue was exposed in Rachel Carson's book, *Silent Spring*? What was the exposure of her efforts?
 Carson's *Silent Spring* was the first of publications warning about the dangers of pesticides and herbicides, warning that the chemicals could be harming nature as well as the birds and the insects. Carson's book exposed the dangers of pesticides and the need for better alternatives.

Concept 52.2 Interactions between organisms and the environment limit the distribution of species

- What is biogeography? What factors determine the distribution of organisms?
 Biogeography is the study of the geographic distribution of species in the context of evolutionary time. Biogeography studies the factors that determine the distribution of organisms.
- Read the section carefully to understand different types of experiments and observations that help explain the distribution of species. As you conclude this section, list and describe five examples of biotic factors.

Abiotic Factor	Example and Description
Food Availability	The amount of food available to an organism is a major factor in determining its distribution. For example, the distribution of the cheetah is limited by the availability of prey.
predation	The amount of predation pressure on an organism is a major factor in determining its distribution. For example, the distribution of the gazelle is limited by the availability of predators.
Competition	The amount of competition for resources is a major factor in determining its distribution. For example, the distribution of the oak tree is limited by the availability of other trees.
Competition with humans	The amount of competition with humans is a major factor in determining its distribution. For example, the distribution of the American bison is limited by the availability of humans.
Introductions	The introduction of new species is a major factor in determining its distribution. For example, the introduction of the cane toad to Australia has led to the decline of native species.

- List five abiotic factors. Include an example and description of each factor's influence on living organisms.

Abiotic Factor	Example and Description
Soil type	The type of soil is a major factor in determining the distribution of plants. For example, the distribution of the cactus is limited by the availability of sandy soil.
Temperature	The temperature of an environment is a major factor in determining the distribution of organisms. For example, the distribution of the polar bear is limited by the availability of cold temperatures.
