Myth Busting Physics Roger I. Parker II, 2020-11-09 When it comes to science the evidence should rule the day Roger I Parker II puts myths revolving around physics to the test in the third edition of Myth Busting Physics Get answers to questions such as Is time a fourth dimension Can quantum fluctuations in a vacuum exist Do photons have mass Is there anything outside the observable universe Can anything be colder than absolute zero Parker also examines why some physicists believe they can get something from nothing and how the Pauli Exclusion Principle provides a way to either prevent time travel or to make it very difficult Other topics include the Casimir Effect the large scale structure of our universe the relationship between thermal radiation light and the warping of space gravity why temperature fluctuations and not mass determine the fate of the universe and our concept of the universe Join the author as he takes a closer look at the universe to show what is true and what we've gotten all wrong
