Structured approach to paediatric emergencies will enable clinicians to manage emergencies in a logical and efficient fashion and will ensure that vital steps are not forgotten even in unfamiliar or infrequent emergency situations (Figure 1.1). This allows:

- Identification of life-threatening situations, allow for resuscitation, direct or definitive treatment, or short-term airway bypass if more complex resuscitation is required.
- Identifying abnormalities, looking for key features while opportunity exists (Figure 1.2).
- Initiation of emergency treatment.
- Identification and transfer for definitive care.
