The Art of Uncertainty David Spiegelhalter, 2025-03-04 Named a Best Book of the Year by Forbes and The Economist From our greatest living statistical communicator Tim Harford comes an invaluable data driven guide for understanding and learning to embrace risk and uncertainty in our daily lives How dangerous is our diet How much of sports falls into the realm of luck When authorities categorize a given event as highly likely how likely is that really Whether we're trying to decide if the benefits of a new medication are worth the chance of side effects or if artificial intelligence truly threatens humanity our lives are riddled with uncertainties both everyday and existential yet it can be difficult to know how to properly weigh all those unknowns Luckily for us renowned statistician David Spiegelhalter has spent his career dissecting data to resolve the apparently random and decode the many decisions we face with imperfect information In The Art of Uncertainty he shows how we can become better at dealing with what we don't know to make smarter choices in a world so full of puzzling variables In lucid lively prose Spiegelhalter guides us through the principles of probability illustrating how they can help us think more analytically about everything from medical advice to sports to climate change forecasts He demonstrates how taking a mathematical approach to phenomena we might otherwise attribute to fate or luck can help us sort hidden patterns from mere coincidences better evaluate cause and effect and predict what's likely to happen in the future Along the way we learn how a misinterpretation of a probability contributed to the infamous Bay of Pigs fiasco why a ship twice the size of the Titanic sank without a trace and why we can be so confident that no two properly shuffled decks of cards have ever been in the same order Sparkling with wit and fascinating real world examples this is an essential guide to navigating uncertainty while also retaining the humility to admit what we don't or simply cannot know The Times Index, 2009 Indexes the Times

School Accountability Great Britain. Parliament. House of Commons. Children, Schools and Families Committee, 2010 This report considers the roles of a variety of different agents for accountability in the English school system The first part examines self evaluation self improvement partners and local authorities Schools have increasingly been encouraged to formalise the self evaluation process as part of their improvement strategy They are assisted in their self evaluation and improvement processes by School Improvement Partners SIPs who are appointed by the local authority School provision is commissioned by local authorities who also have a remit to monitor local schools performance The report then focuses on the work of Ofsted School inspection reports are a major source of information about a school s performance and inspection is often the trigger for a school to address its performance issues The report then looks at the Achievement and Attainment Tables formerly known as performance tables The tables have been the subject of controversy for many years because although they do not actually rank schools according to their performance in national examinations they permit others especially the media to do so Critics argue that they give only a partial view of a school s overall performance and the proposed School Report Card is an attempt to address this issue by providing more information on a wider range of performance indicators The school accountability process has become very complex with new programmes and policies emerging piecemeal from central government There are concerns about the consistency of approach in such a complex system And are schools really free to drive their own improvement given that they are still subject to programmes devised and applied by central government
