ICS-formoterol is the preferred reliever for patients prescribed maintenance and reliever therapy. For other ICS-LABAs, the reliever is SABA

### Asthma medication options:

Adjust treatment up and down for individual patient needs

#### PREFERRED CONTROLLER

to prevent exacerbations and control symptoms

Other controller options

#### STEP 1

As-needed low dose ICS-formoterol \*

Low dose ICS taken whenever SABA is taken †

#### STEP 2

Daily low dose inhaled corticosteroid (ICS), or as-needed low dose ICS-formoterol \*

Daily leukotriene receptor antagonist (LTRA) or low dose ICS taken whenever LABA taken †

#### STEP 3

Low dose ICS-LABA

Medium dose ICS, or low dose ICS+LTRA †

#### STEP 4

Medium dose ICS-LABA

High dose ICS, add-on tiotropium, or add-on LTRA †

#### STEP 5

High dose ICS-LABA  
Refer for phenotypic assessment & add-on therapy e.g. tiotropium, anti-IgE, anti-IL5/IL5R, anti-IL4/IL13

Add low dose OCS, but consider side-effects

#### PREFERRED RELIEVER

## **Bronchial Asthma Gina Guidelines 24:**

*Clinical Asthma* Jonathan A. Bernstein, Mark L. Levy, 2014-02-06 Enormous progress in asthma research has been made in the past 50 years including a greater understanding of its complex pathogenesis and new and more effective therapies. Consequently the scientific literature has grown vast and can be difficult to integrate. With contributions from a distinguished panel of world renowned authors *Clinical Asthma Theory and Practice* presents a comprehensive study of both the common and the more challenging problems faced by all health care personnel who treat patients with asthma. The book is divided into seven sections starting with the basics of asthma and ending with a discussion on the approach to asthma worldwide and in the primary care setting. Reflecting a strong clinical emphasis each chapter begins with a patient case study supported by essential background information on the basic science and clinical decision making process. This is followed by a discussion of clinical evaluation and management. The multidisciplinary coverage explores a range of topics including genetics, inflammation, immunology and the identification of different endotypes. Using a bench to bedside approach the book links basic science to the clinical management of asthma and explores options for improvement. The carefully selected authorship from experts worldwide presents a truly global outlook. [Textbook of Pulmonary and Critical Care Medicine Vols 1 and 2](#) SK Jindal, PS Shankar, Suhail Raoof, Dheeraj Gupta, 2011-01-31 This book published in two volumes. Both volumes divided in twenty three sections all sections and chapters are most important. The *Textbook of Pulmonary and Critical Care Medicine* also offers a unique exposure to the problems in many parts of the world. Tuberculosis the number one treatable condition has been extensively covered and special topics such as multi drug resistance, directly observed therapy, TB prevention, nonpharmacologic approaches and extrapulmonary tuberculosis are particularly relevant. Many countries are facing a growing burden of noncommunicable respiratory diseases. They have become the second leading cause of death after injuries and their impact on indirect costs such as loss of work and home productivity is enormous. These problems are addressed and measures of prevention such as smoking cessation are included. Other special challenges including topics such as indoor and outdoor air pollution, climate change, poisoning with pesticides, snakebite toxicity, pulmonary manifestations of tropical infections and industrial accidents such as the tragedy seen in Bhopal, Madhya Pradesh with methyl isocyanate have been well covered. However as globalization flattens the playing field and countries leap to industrialization, cultural beliefs, natural resources, climate and geography have slowed the pace of development in many parts of the world. Poverty leads to malnutrition, homelessness, lack of education and poor access to health care. Overcrowded cities and rural underdevelopment are other challenges that impact health in the various parts of the world. Moreover epidemics of HIV, drug abuse and smoking addiction take a greater toll on the population. Yes the world is flat but the terrain is filled with mountains and valleys and local problems demand local solutions. And these local problems need to be explored and presented with a scholarly perspective. The *Textbook of Pulmonary and Critical Care Medicine* has successfully incorporated these sociodemographic

factors into the subject matter The text is well written and the chapters are carefully referenced with subjects found in all traditional pulmonary and critical care textbooks e g airway diseases interstitial lung disease pleural disease pulmonary neoplasia pulmonary infection sleep and critical care There are several nontraditional sections as well that are practical and especially helpful to the practicing physician These include a section on the symptom approach to lung disease an overview of the pharmacologic agents used to treat lung disease and a comprehensive review of methods in lung diagnosis from the simple history and physical examination to the latest complex tools of interventional pulmonology The textbook is especially unique because of the abundance of illustrations flow charts and tables There are many radiographic and pathologic reproductions that are especially helpful     Rau's Respiratory Care Pharmacology - E-Book Douglas S.
