

Scientific research reports

Format of research reports in the faculty of Science

Research reports in the Sciences contain common elements and generally follow the basic format outlined as follows.

Title

Your title should be brief, topic-specific and informative, clearly indicating the purpose and scope of your study. Include **key words** in your title so that search engines can easily access your work. Example:

Measurement of water flows around Station Pier

Abstract

An abstract is a concise summary that enables readers to quickly assess the contents and direction of your paper.

It should be brief (around 5% of the total), written in a single paragraph and should cover the scope and purpose of your paper.

For more information on writing an abstract please refer to the Academic Skills Flyer: Writing an Abstract.

Introduction

The introduction sets the context for your research. It should supply sufficient background to allow the reader to understand and evaluate the present study without needing to refer to previous publications.

After reading the introduction your reader should understand **exactly** what your research is about, what you plan to do, why you are undertaking this research and which methods you have used.

Introductions generally include:

- the **rationale** for the present study. Why are you interested in this topic? Why is this topic worth investigating?
- **key terms and definitions**
- an **outline** of the research questions and hypotheses; the assumptions or propositions that your research will test.

Literature Review

A literature review is a critical survey of recent relevant research in a particular field. Its purpose is both to offer the reader an overview of the current state of research and to situate your paper within that research.

Frequently, the review is part of the introduction

The review should be a selection of carefully organised, focused and relevant literature that develops a narrative 'story' about your topic. Your review should answer key questions about the literature:

- What is the current state of knowledge on the topic?
- What differences in approaches / methodologies are there?
- Where are the strengths and weaknesses of the research?
- What further research is needed?

The review may identify a gap in the literature which provides a rationale for your study and supports your research questions and methodology.

Methodology (Materials and Methods)

The purpose of this section is to detail how you conducted your research so that others can understand and replicate your approach. You need to briefly describe the subjects (if appropriate), any equipment or materials used and the approach taken.

If the research method or method of data analysis is commonly used within your field of study, then simply reference the procedure. If, however, your methods are new or controversial then you need to describe them in more detail and provide a rationale for your approach.

The methodology is always written in the past tense. This section should be written succinctly.

Results

This section is a concise, tabular or graphic summary of your findings, listed under headings appropriate to your research questions.

Present your results in a consistent manner. For example, if you present the first group of results as percentages, it will be confusing for the reader and difficult to make comparisons of data if later results are presented as fractions or as decimal values.

Do not discuss your results here. Any analysis of your results occurs in the Discussion section.

Raw data or details about the method of statistical analysis used should be included in the Appendices.

Science Research Paper Template

S Marginson

Science Research Paper Template:

Researcher's Guide: Templates and guidelines for Research article in SCI journal Dr. M. Jayachandran, In the realm of academic research and scholarly publishing achieving recognition in prestigious SCI Science Citation Index Journals is a pinnacle of success However the path to successful publication can be arduous filled with intricate guidelines rigorous standards and the need for absolute precision That s where Researcher s Guide Templates and Guidelines for Research Articles in SCI Journals comes to your aid This meticulously crafted book is designed as an indispensable companion for researchers scientists and academics of all levels who aspire to not only meet but exceed the expectations of SCI Journals Whether you are a seasoned scholar or an early career researcher this guide empowers you with the tools and knowledge needed to navigate the complex world of research article writing with finesse and confidence Key Features Templates for Every Section The heart of this book lies in its meticulously designed templates for each section of a research article from abstract to conclusion These templates are like a compass guiding you through the intricate structure of your paper while ensuring compliance with the exacting standards of SCI Journals Guidelines and Best Practices In addition to templates this guide provides comprehensive guidelines and best practices for crafting research articles that captivate readers and reviewers alike Learn how to create compelling titles write engaging abstracts conduct thorough literature reviews present results effectively and construct impactful discussions Ethical Considerations Understand the ethical considerations that underpin responsible research and publishing Discover how to navigate issues related to authorship conflicts of interest and the responsible use of data Peer Review Insights Gain insights into the peer review process and learn strategies for effectively handling reviewer feedback Transform the peer review process from a challenge into an opportunity for improvement Resources for Continued Growth Beyond the templates and guidelines this book equips you with valuable resources including additional reading materials citation style guides and references to further hone your research writing skills Interdisciplinary Perspective While the book provides a strong foundation in scientific writing it is designed to be adaptable across disciplines ensuring its relevance to a wide range of research fields including engineering social sciences natural sciences and more This book is more than just a book it is your gateway to the world of impactful scientific publishing Whether you aim to disseminate groundbreaking discoveries contribute to your field s body of knowledge or simply enhance your research writing skills this guide is your trusted companion on the journey to success Don t let the intricacies of research article writing hold you back With this book you have the tools templates and expertise at your fingertips to elevate your research articles to the highest standards of excellence ensuring your work is not only published but celebrated in the esteemed pages of SCI Journals Embark on your journey to scholarly excellence today with **Researcher s Guide Templates and Guidelines for Research Articles in SCI Journals** **Writing Scientific Research Articles** Margaret Cargill, Patrick O'Connor, 2009-04-20 Margaret Cargill s background as a linguist and research communications educator and Patrick O

Connor's experience as both research scientist and educator synergize to improve both the science and art of scientific writing. If the author's goal is to give scientists the tools to write and publish compelling well-documented clear narratives that convey their work honestly and in proper context, they have succeeded admirably.

Veterinary Pathology July 2009. The book is clearly written, has a logical step-by-step structure, is easy to read, and contains a lot of sensible advice about how to get scientific work published in international journals. The book is a most useful addition to the literature covering scientific writing.

Aquaculture International April 2009. **Writing Scientific Research Articles: Strategy and Steps** guides authors in how to write as well as what to write to improve their chances of having their articles accepted for publication in international peer-reviewed journals. The book is designed for scientists who use English as a first or an additional language for research, students, and those who teach them paper-writing skills, and for early-career researchers wanting to hone their skills as authors and mentors. It provides clear processes for selecting target journals and writing each section of a manuscript, starting with the results. The stepwise learning process uses practical exercises to develop writing and data presentation skills through analysis of well-written example papers. Strategies are presented for responding to referee comments, as well as ideas for developing discipline-specific English language skills for manuscript writing. The book is designed for use by individuals or in a class setting. Visit the companion site at www.writeresearch.com.au for more information.

Mastering Academic Writing in the Sciences Marialuisa Aliotta, 2018-04-17. This book provides a comprehensive and coherent step-by-step guide to writing in scientific academic disciplines. It is an invaluable resource for those working on a PhD thesis, research paper, dissertation, or report. Writing these documents can be a long and arduous experience for students and their supervisors, and even for experienced researchers. However, this book can hold the key to success. Mapping the steps involved in the writing process, from acquiring and organizing sources of information to revising early drafts to proofreading the final product, it provides clear guidance on what to write and how best to write it. Features: Step-by-step approach to academic writing in scientific disciplines. Ideal guidance for PhD theses, papers, grant applications, reports, and more. Includes worked-out examples from real research papers and PhD theses, and templates and worksheets are available online to help readers put specific tasks into practice.

Integrity of Scientific Research Joel Faintuch, Salomão Faintuch, 2022-10-13. This book provides a scientific and ethical approach to all forms of fraud and misconduct, focusing on a scholarly, however practice-oriented, description of the problems, roots, and potential solutions. Organized in dedicated parts, an international team of experts systematically analyzes the most prevalent forms of misconduct: ghost writing, pseudo science, dubious trials, predatory journals, fake news, mistreatment, and harassment in research publications at academic institutions and in the professional and healthcare environment. A special focus is given to corrective interventions and the role of prevention, education, and training. Comprehensive in its scope, the book offers an easy-to-read overview along with a number of real cases for experienced and novice personnel alike. The significance of scientific integrity and research ethics increased during

the last couple of years and ethic committees and offices have become an integral part at universities hospitals research institutions government agencies and major private organizations all over the world Thus this book provides an indispensable comprehensive overview across disciplines and for everybody working in research and affiliated institutions Chapter 37 is available open access under a Creative Commons Attribution 4 0 International License via link springer.com JOURNAL
