With the fact that rainwater harvesting is a viable technology in urban settings, all that is left to take advantage of this resource is to turn the rainwater falling on your roof and direct it to a rainwater harvesting tank. By doing this, you not only have control of your water supply and replace at least a substantial portion of your water needs. Rainwater harvesting systems can be configured to supply your whole house and/or your landscape. What Are The Benefits Of Rainwater Collection? Rainwater is a relatively clean and absolutely free source of water. You have total control over your water supply and for cities with water restrictions, it is ideal and environmentally friendly. It promotes longevity and helps preserve water resources both in the home and in gardens because it reduces the amount of water runoff from homes and businesses. It can solve drainage problems in your yard while saving you with rainwater. It is a simple technology that is inexpensive and easy to maintain. It can be used as a main source of water for a backwater source to wells and municipal water. The tank can be left to collect rainwater or it can be built during new home construction. Systems are versatile and in a modular nature allowing for expansion or reduction. It can provide an excellent backup source of water for emergency use. Not only is it free, but it is also a great way to save money. Why Is Rainwater Harvesting Important?
