American Airlines Mobile:

The Mobile Mind Shift Ted Schadler, Josh Bernoff, Julie Ask, 2014-06-24 Mobile has reprogrammed your customers brains Your customers now turn to their smartphones for everything What s tomorrow s weather Is the flight on time Where s the nearest store and is this product cheaper there Whatever the question the answer is on the phone This Pavlovian response is the mobile mind shift the expectation that I can get what I want anytime in my immediate context Your new battleground for customers is this mobile moment the instant in which your customer is seeking an answer If you re there for them they ll love you if you re not you ll lose their business Both entrepreneurial companies like Dropbox and huge corporations like Nestl are winning in that mobile moment Are you Based on 200 interviews with entrepreneurs and major companies across the globe The Mobile Mind Shift is the first book to explain how you can exploit mobile moments You ll learn how to Find your customer s most powerful mobile moments with a mobile moment audit Master the IDEA Cycle the business discipline for exploiting mobile Align your business and technology teams in four steps Identify Design Engineer Analyze Manufacture mobile moments as Krispy Kreme does it sends a push notification when hot doughnuts are ready near you Result 500 000 app downloads followed by a double digit increase in same store sales Turn one time product sales into ongoing services and engagement as the Nest thermostat does And master new business models as Philips and Uber do Find ways to charge more and create indelible customer loyalty Transform your technology into systems of engagement Engineer your business and technology systems to meet the ever expanding demands of mobile It s how Dish Network not only increased the efficiency of its installers but also created new on the spot upsell opportunities Mobile is rapidly shifting your customers into a new way of thinking You ll need your own mobile mind shift to respond *The Best 100 Free Apps for Libraries* Jim Hahn, 2013-05-13 Librarian Jim Hahn has carefully culled the over 500 000 available apps down to the 100 that are the absolute best for day in day out library services The guide covers apps for Apple and Android devices including tablets Each entry in this long needed guide contains a basic summary of how each app operates at least one example of how that app can be used by a librarian one example of how it can help a library user access library services a section highlighting critical limitations and apps that may better serve a librarian s needs and the next possible iteration of the app Entries are accompanied by a photo of the app in action so this current guide is both descriptive and visual Introductory and final chapters cover using apps in library settings and library services as well as what the future should bring in this area This guide is intended as an introduction for those with little or no app experience and for those wanting to know more about app uses for information access **Mobile Agents and Security** Giovanni Vigna, 2003-05-20 New paradigms can popularize old technologies A new standalone paradigm the electronic desktop popularized the personal computer A new connected paradigm the web browser popularized the Internet Another new paradigm the mobile agent may further popularize the Internet by giving people greater access to it with less eort MobileAgentParadigm The mobile agent paradigm

integrates a network of computers in a novel way designed to simplify the development of network applications To an application developer the computers appear to form an electronic world of places occupied by agents Each agent or place in the electronic world has the authority of an individual or an organization in the physical world The authority can be established for example cryptographically A mobile agent can travel from one place to another subject to the destination place's approval The source and destination places can be in the same computer or in different computers In either case the agent initiates the trip by executing a go instruction which takes as an argument the name or address of the destination place The next instruction in the agent's program is executed in the destination place rather than in the source place Thus in a sense the mobile agent paradigm reduces networking to a program instruction A mobile agent can interact programmatically with the places it visits and if the other agents approve with the other agents it encounters in those places
