**Dominance and Monopolization** Rosa Greaves, 2017-05-15 Antitrust and competition law is a fast moving area of law and the subject of extensive academic research The aim of this volume is to select articles as tools for understanding how antitrust and competition law is applied to unilateral conduct which is harmful to the consumer and to the competitiveness of the market The articles examine the meaning of dominance and monopolisation and show that although legal and economic rules have been developed to establish whether undertakings hold such strong market positions it is often difficult to determine with certainty that the undertaking being investigated meets the threshold The various debates on pricing and non pricing conduct are also represented as are the conflicts that have arisen regarding the exercise of intellectual property rights by powerful undertakings particularly in the context of the new economies The volume includes scholarly articles published on both sides of the Atlantic and enables a greater understanding of the application of antitrust and competition law from the point of view of economics and politics **F&S Index United States** ,1997 *Handbook of Airline Strategy* Gail F. Rhoades, 2016-04-15 The purpose of this book is twofold First it lays out the forces that shaped the international aviation industry and that changed all the rules in the drive for liberalization Second it looks at the many interesting and difficult choices ahead that the airline industry in general and the international aviation industry in particular face These choices include many dichotomies pulling back from the trend toward liberalization or embracing the liberalization trend merging in search of profitability or fragmenting the industry in search of economies These possible futures are explored including the pros and cons of each future from a national consumer employer and employee perspective As with the previous two editions *Evolution of International Aviation* reviews the historical development of the international aviation system From this foundation it then provides an updated and expanded account of the current state of the aviation and aerospace industry including profitability consolidation and merger activity New to this edition the book broadens the coverage of the industry segments airlines air cargo and manufacturing to include the emerging commercial space sector It also emphasizes the relationship between
