The Convergence of K-12 and Higher Education Christopher P. Loss,Patrick J.

McGuinn,2021-03-02 In The Convergence of K 12 and Higher Education two leading scholars of education policy bring together a distinguished and varied array of contributors to systematically examine the growing convergence between the K 12 and higher education sectors in the United States Though the two sectors have traditionally been treated as distinct and separate the editors show that the past decade has seen an increasing emphasis on the alignment between the two At the same time the national focus on outcomes and accountability originating in the K 12 sector is exerting growing pressure on higher education while trends toward privatization and diversification long characteristic of the postsecondary sector are influencing public schools This volume makes the powerful case that it is no longer possible to think of one sector in the absence of the other given the economic demographic and technological forces that are pushing the educational system toward convergence Taken together the chapters in this book provide a promising new line of inquiry for examining contemporary questions in education policy

Just Schools David L. Kirp,James D Marver Professor at the Goldman School of Public Policy David L Kirp,1982-01-01 Examines the goals of equality in education reviews the experiences of five

communities and recommends policy measures to improve educational opportunity in the United States

With the Best of Intentions Frederick M. Hess,2005-01-01 Bringing together a mix of researchers and practitioners With the Best of Intentions examines the major goals of recent philanthropic efforts and looks at some of the key lessons for educators philanthropists policymakers and community leaders of philanthropic contributions to schools and school systems From the Gates small school initiative to the Annenberg challenge to the Broad prize for urban education philanthropic giving has played an increasingly prominent role in recent years in education reform efforts across the United States Yet while we recognize that philanthropic organizations influence education in countless ways we know strikingly little about the extent dynamics and results of their efforts This lack of knowledge calls out for urgent attention of total K 12 spending it has a disproportionate

impact in shaping reform agendas and promoting cutting edge efforts to improve schools and classrooms. With the *Best of Intentions* aims to fill this gap offering lively perspectives on the role of philanthropy in K-12 education. It opens by surveying the current landscape in philanthropic giving to education then examines the major goals of recent philanthropic efforts building new schools supporting troubled districts promoting school choice and advancing educational research and policy. The book concludes by looking at some of the major lessons for educators philanthropists policymakers and community leaders of philanthropic contributions to schools and school systems. An informative and multifaceted volume. With the *Best of Intentions* is also full of debates and controversies. It will be of interest to scholars policymakers and education and community leaders as well as to the philanthropic community itself.

Visions of Schooling Rosemary C.

Salomone, 2008-10-01 DIV At no time in the past century have there been fiercer battles over our public schools than there are now. Parents and educational reformers are challenging not only the mission content and structure of mass compulsory schooling but also its underlying premise that the values promoted through public education are neutral and therefore acceptable to any reasonable person. In this important book Rosemary Salomone sets aside the ideological and inflammatory rhetoric that surrounds today's debates over educational values and family choice. She offers instead a fair minded examination of education for democratic citizenship in a society that values freedom of conscience and religious pluralism. And she proposes a balanced course of action that redefines but does not sever the relationship between education and the state. Salomone demonstrates how contemporary conflicts are the product of past educational and social movements. She lays bare some of the myths that support the current government monopoly over education and reveals how it privileges those of economic means. Through a detailed case study of recent controversy in a suburban New York school district the author explores the legal and policy issues that arise when widely disparate world views stand in the way of political compromise on educational materials techniques and programs. Salomone builds a case for educational governance that places the developmental needs of the child at the center of family autonomy. She advances a plan that respects diverse values and visions of schooling while preserving the core commitments that bind our nation.
