## **Automotive Technology For General Service Technicians:**

**Automotive Technology for General Service Technicians** Ron Haefner, Paul Leathers, 2008 Introducing the first automotive technology textbook designed for NATEF's General Service Technician Program. This new text provides a foundation of general theory and operation for the tasks specified in the NATEF GST Standards and covers the most common repair and diagnostic procedures for all eight major automotive systems. The authors highlight the importance of workplace skills and discuss employee responsibilities such as preparing vehicles for service and delivering them to customers. Pre-publication reviews praised the book's readability, real life examples, and simple but accurate presentation of technical information. I love the non-complex development of the subjects in the text. You have really made an easy to understand text for students said one. This book can teach the kids said another. *Fundamentals of Automotive Technology* CDX

Automotive, 2013 *Fundamentals of Automotive Technology Principles and Practice* covers crucial material for career and technical education secondary post secondary and community college students and provides both rationales and step by step instructions for virtually every non-diagnosis NATEF task. Each section provides a comprehensive overview of a key topic area with real life problem scenarios that encourage students to develop connections between different skill and knowledge components. Customer service, safety and math, science and literary principles are demonstrated throughout the text to build student skill levels. Chapters are linked via cross reference tools that support skill retention, critical thinking and problem solving. Students are regularly reminded that people skills are as important as technical skills in customer service fields.
